## Instruments

### Instrument cluster overview

The instrument cluster is the central information center for the driver.

Fig. 3: Instrument cluster overview

① Engine coolant temperature gauge	10
② Tachometer	11
- with status indicator OFF	74
- with status indicator READY	79
③ Turn signals	45
④ Display with	
- Driver information system	23
- Indicator lights	31
⑤ Tachometer	
⑥ Fuel level	11

### **i** Tips

The instrument illumination for the needles and dials turns on when the ignition is turned on and the lights are turned off. The illumination for the dials reduces automatically and eventually turns off as brightness outside increases. This function reminds the driver to turn the headlights on at the appropriate time.

### Engine coolant temperature gauge

The engine coolant gauge ① → page 10, fig. 3 only works when the ignition is on. To prevent

damage to your engine, please note the following important points:

#### Engine cold

If only the LEDs at the bottom of the gauge turn on, the engine has not reached operating temperature yet. Avoid high engine speeds, heavy engine loads and heavy throttle applications.

#### Normal temperature

The engine has reached its operating temperature once the LEDs up to the center of the gauge turn on under normal driving conditions. The LEDs higher up may turn on when the engine is under heavy load or the exterior temperature is high. This is no need to worry as long as the  warning light in the instrument cluster does not illuminate. If the LEDs in the upper area of the display and the indicator light  in the instrument cluster display turn on, the coolant temperature is too high → page 25.

### WARNING

- Always observe the warning in → page 216, before opening the hood and checking the engine coolant level.
