Handbook of Literacy and Technology David Reinking, Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, 1998-04-01
The major shift going on today in the technologies of reading and writing raises important questions about conventional conceptions of literacy and its role in education society and culture. What are the important characteristics of electronic forms of reading and writing distinguishing them from printed forms? To what extent and in what ways is literacy being transformed by new technologies? This central question is addressed in this volume from diverse multidisciplinary perspectives. The contributing authors focus on a guiding question in one of the following areas which correspond to the major sections of the book: Transforming Texts, What are the new differences between printed and electronic texts and what are the implications of new textual forms for defining literacy especially in regard to teaching and learning in schools? Transforming Readers and Writers, How do electronic reading and writing change conceptualizations of literacy development from childhood through adulthood? Transforming Classrooms and Schools, What are the effects of introducing new reading and writing technologies into schools and classrooms? Transforming Instruction, How can instruction be adapted in response to the changing literacy landscape and how can teachers and students exploit forms of reading and writing to enhance teaching and learning? Transforming Society, What are the broad societal implications of the increasing prevalence of electronic forms of reading and writing? Transforming Literacy Research, What are the questions that must be addressed as digital reading and writing become more common and what approaches to research will be most useful in addressing those questions? This volume is the result of an interactive process. The contributors met as a group to discuss drafts of their chapters at a one day meeting convened and sponsored by the National Reading Research Center and had read each others chapters prior to this gathering. That meeting was followed by a two day conference attended by approximately 180 researchers, educators and policymakers who responded to an open invitation to present papers and to attend sessions focusing on the six major themes of the book. Contributors then revised their chapters based on interactions with fellow contributors, conference participants and volume editors. Thus this work is more than just a compilation of the individual authors views. Rather it represents a synthesis of a broad range of current thinking about how literacy is being and may be transformed by technology.

Driver License Manuals Best Practices Deborah Meyers ((Of Partners In Brainstorms, Inc.)), 2005 Each motor vehicle jurisdiction in the United States has an established process by which it assesses the required knowledge of driver license applicants to determine whether they are able to operate their vehicles safely and thus qualify for a driver's license. Corollary to that assessment process is the jurisdiction's responsibility to provide drivers with the information for which they are to be held responsible during the licensing exam and subsequently while operating their vehicle on our nation's roadways. The primary means of providing this information to drivers is the jurisdiction's basic driver license manual. This study was directed at identifying best practices.

with regard to the basic driver license manuals produced by motor vehicle jurisdictions To identify best practices three types of information sources were consulted 1 driver license manuals produced by motor vehicle jurisdictions throughout the country 2 driver safety information produced by relevant government agencies and private organizations and 3 research news education and popular literature Of 212 knowledge items recommended by the American Association of Motor Vehicle Administrators AAMVA for inclusion in driver manuals 119 were addressed by a majority 51% or more of the manuals reviewed and are considered best practices in subject matter content Additional topics that should be considered best practices in subject matter content are intersection safety particularly with regard to red light running sharing the road with trucks particularly emphasis on their No Zones road rage and aggressive driving driver distraction seatbelt usage particularly with regard to the jurisdiction s primary or secondary seatbelt laws and following distance with emphasis on the need for a three or four second gap With regard to factors other than subject matter content it was found that most jurisdictional manuals 77% are smaller than the 8 1 2 in x 11 in size of the Arizona manual with 48% opting for the compact 5 1 2 in x 8 1 2 in More than half the jurisdictions produce a version of the manual in Spanish and more than a third of the jurisdictions produce a specialized driver manual directed at teen learners and their parents and encouraging parents active involvement in their teen s learning process Words on Cassette, 2002 R R Bowker Publishing,2002 A to Z Guide of Public Employment Law Sandra T.
