CPA consultant and accounting educator has written a comprehensive manual that will enable accountants to upgrade their practices systematically and develop the human relations competence that is vital to managing a successful practice. The first several chapters discuss the need to accept a basic business orientation through a stated business purpose and to define the size and scope of a practice as well as personal finance goals. The author next considers such basics as liability insurance, employment contracts and financing methods. A major section of the book is devoted to working relationships with bookkeepers and other staff, partners, bankers and the Internal Revenue Service. Chapters on client services offer specific guidelines on management concerns relating to auditng, review and compilation tax practice management, advisory services and client write up services. Turning to the question of marketing, the author gives detailed advice on soliciting clients, advertising and the creating of a firm image and explores the ethical issues involved. He describes the various ways that computers can assist the practitioner in managing a practice. He suggests an organized approach to accounting practice administration and outlines the use of financial statements and break even analysis in practice management. The final chapter, which includes a case study, deals with business budgeting and sales forecasting as they relate to banking relationships, business management and personal financial planning. This convenient logically organized manual is an invaluable resource for the accounting practitioner who wishes to maximize financial return and to develop the kind of well run practice that can retain clients despite increased competition. It is an appropriate acquistion for the business and accounting collections of academic and public libraries.
