Classes 1 to 5 has meticulously followed the National Education Policy NEP 2020 and the National Curriculum Framework NCF 2023. Pramanas, Panchakosha, Vikas and Panchpadi, the three main constituents, have been used significantly through the explanations, examples, and exercises used in this series. It means the focus has shifted to the process of learning. This series envisages conceptual understanding as a continuous process. The books for Classes 1 and 2 include English, Mathematics, Environmental Studies, and General Knowledge. For Classes 3 to 5, the subjects expand to include English, Mathematics, Science, Social Studies, and General Knowledge. In developing this educational series, considerable attention has been focused on creating an engaging and enjoyable learning environment. This approach aims to establish a solid educational foundation for young learners, contributing to their all-around growth and development at every educational level. The series is characterised by several notable features: Integrates key educational concepts with visually appealing activities, interactive games, and practical real-world examples; Methodically structured and comprehensive exercises ensuring thorough assessment and understanding; Robust online support including animated tutorials, interactive modules, subject-specific videos, and digital books exclusively for teacher use, tailored to meet the needs of each topic; ENGLISH Combines with historical and contemporary elements, it focuses on interest-based selections to engage learners and improve memory retention. It emphasises the four key language skills: Listening, Speaking, Reading, Writing, with clear grammar explanations; MATHEMATICS With engaging and thorough presentation of concepts, it is suitable for all learning levels using a graded and age-appropriate approach; ENVIRONMENTAL STUDIES It focuses on analysis and inquiry, encouraging learning through discussion, observation, and conversation; SCIENCE It offers meaningful learning by connecting scientific concepts to students' everyday experiences and the natural world; SOCIAL STUDIES In this subject, innovative teaching methods are used to enhance life skills, civic understanding, and prepare students for life's challenges; GENERAL KNOWLEDGE It is designed to incite curiosity and a passion for learning about the world. Online support in the form of animated Lesson, interactive exercises, topic-wise videos, and E-books for Teachers only, as per the requirement of the subject. Teachers Resource Book (TRB) includes Lesson Plan and Learning Objectives along with the answers of the questions to facilitate teaching. **Atomindex**, 1980 Frontiers in the Acquisition of Literacy Claire M. Fletcher-Flinn, 2015-09-28. Learning to read and to spell are two of the most important cultural skills that must be acquired by children, and for that matter, anyone learning a second language. We are not born with an innate ability to read. A reading system of mental representations that enables us to read must be formed in the brain. Learning to read in alphabetic orthographies is the acquisition of such a system which links mental representations of visual symbols (letters in print, words) with pre-existing phonological sound and semantic comprehension cognitive systems for language. Although spelling draws on the same representational knowledge base and is usually correlated with reading, the acquisition processes involved are not quite the same. Spelling requires the sequential

production of letters in words and at beginning levels there may not be a full degree of integration of phonology with its representation by the orthography Reading on the other hand requires only the recognition of a word for pronunciation Hence spelling is more difficult than reading and learning to spell may necessitate more complete representations or more conscious access to them The learning processes that children use to acquire such cognitive systems in the brain and whether these same processes are universal across different languages and orthographies are central theoretical questions Most children learn to read and spell their language at the same time thus the co ordination of these two facets of literacy acquisition needs explication as well as the effect of different teaching approaches on acquisition Lack of progress in either reading and or spelling is also a major issue of concern for parents and teachers necessitating a cross disciplinary approach to the problem encompassing major efforts from researchers in neuroscience cognitive science experimental psychology and education The purpose of this Research Topic is to summarize and review what has been accomplished so far and to further explore these general issues Contributions from different perspectives are welcomed and could include theoretical computational and empirical works that focus on the acquisition of literacy including cross orthographic research
