Grounded in the theory that learners are more successful listeners when they activate their prior knowledge of a topic, the series gives students a frame of reference to make predictions about what they will hear. Through a careful balance of activities, students learn to listen for main ideas, to listen for details, and to listen and make inferences. Active Listening Second Edition is intended for high beginning to intermediate students. It can be used as a main text for listening classes or as a component in speaking or integrated skills classes.
