Active Games for Children on the Autism Spectrum Erin Bennett, Mary Dyck, 2023-04-18 Every school wants to be inclusive. But often children on the autism spectrum are left behind when it comes to participating in physical education and becoming physically literate in part because many physical educators feel unprepared to include children on the spectrum in class activities. That's where Active Games for Children on the Autism Spectrum comes in. Theoretical Framework Games and Lesson Plans. This text provides both the adaptive framework teachers need and more than 80 games to help children on the spectrum take part in physical activity, learn from games and enjoy being active. Beyond the framework and games the book will help physical educators, parents and caregivers and others develop the courage, competence and confidence they need to teach and help children on the autism spectrum. Active Games for Children on the Autism Spectrum offers an exploration of the ABCs of physical literacy: agility, balance, coordination and speed. Breakdowns of 16 specific skills including fundamental movement skills: bike riding, skateboarding or scootering, swimming and ice skating. 22 games to practice the ABCs and skills: 30 single equipment games using Hula Hoops, bean bags, scarves, rubber balls, gator balls and racquets and balloons; 29 lesson plans for target games, net and wall games, striking and fielding games and invasion games using the Teaching Games for Understanding approach; 21 bonus games to practice what is learned in the lessons; 14 warm up and sport skill games; 4 warm up games to be used in an inclusive class and 1 sample home or gym fitness program. Games Are Easy to Use and Purposeful. The games are easy to use with clear instruction on how to effectively teach movement skills to all students including those on the spectrum. The games are active, enjoyable and imbued with purpose. They are accessible to anyone working with children on the autism spectrum in school, at home or in other settings. What Sets This Book Apart: What sets this text apart from similar books is its wealth of theoretical and practical content beyond the games. Its focus on physical activity, wellness, health inclusion and physical literacy in a wide variety of environments along with its foundational content makes Active Games for Children on the Autism Spectrum highly valuable to both experienced and inexperienced teachers as well as parents and others working with children with autism. Chapters on physical literacy, adapting physical activity planning, movement skills, community, family and friends and fitness create a well rounded, thorough exploration of how to help children on the spectrum enjoy the benefits of physical education and an active lifestyle. In doing so, these children can enhance their health, improve their motor skills and strengthen their social skills.

303 Kid-Approved Exercises and Active Games

Kimberly Wechsler, 2012-06-12 With game consoles and the Internet, children are playing as much as they always have but now they sit still while doing it. Kids spend as much time watching TV, using computers and playing video games as they spend in school each week. One in every three kids in America is considered overweight or obese and the number one concern that parents bring up to pediatricians is keeping kids fit. Half of all children are not physically active enough for the development of a healthy cardiovascular system. 303 Kid Approved Exercises and Active Games helps 6-8 year old kids get off

their chairs with fun and age appropriate exercises. Exercise for children must be fun. These exercises have been used for personal training sessions, kids fitness classes, kids fitness camps, birthday parties and in schools. They have all been Kid Approved. Kimberley Wechsler, a specialist in Kid's Fitness, took into account the fundamental attributes of being a child while developing these exercises. Children have specific physiologic differences that make them unique. They grow, mature and develop skills at different ages, so what may be skill appropriate for one child could be harmful for another child. These exercises reflect the emotional, social, physical level of this age group. At this age, children feel confident with the basic skill of fitness and are now ready to be challenged to more complex moves. They are now at the skill level in which physical challenges like balance, muscle building, hand eye, hand foot coordination, increasing challenges for their fine and gross motor skills and functional training can be more added. They are growing in their intellectual and emotional processes as well, which now allows this age group to follow and understand simple rules of a sport. They are also introduced to the concept of friendly competition and sports fitness. Children also enjoy using their imagination and fantasy, so exercises require the use of their imagination. There are games and fitness challenges that require kids to take an active role in learning new skills and there are introductions to new sports. Kids still enjoy outside participation, so families, friends, educators and counselors can participate in all of the 303 activities. Kids at this age can't seem to sit still; their minds are always thinking and their bodies are always moving. Children have short attention spans, so most of the activities can be played within a 15 minute period of time and many choices are offered throughout the book. 303 Kid Approved Exercises and Active Games supports children's energy and directs it in a positive way. The activities take advantage of a child's natural tendency to be active with unstructured or free play. 303 Kid Approved Exercises and Active Games develops intellectual, emotional and social skills for children all the while promoting an active and healthy lifestyle.
