Handbook of Research on Using Educational Robotics to Facilitate Student Learning Papadakis, Stamatios,Kalogiannakis, Michail,2020-12-05 Over the last few years increasing attention has been focused on the development of children s acquisition of 21st century skills and digital competences Consequently many education scholars have argued that teaching technology to young children is vital in keeping up with 21st century employment patterns Technologies such as those that involve robotics or coding apps come at a time when the demand for computing jobs around the globe is at an all time high while its supply is at an all time low There is no doubt that coding with robotics is a wonderful tool for learners of all ages as it provides a catalyst to introduce them to computational thinking algorithmic thinking and project management Additionally recent studies argue that the use of a developmentally appropriate robotics curriculum can help to change negative stereotypes and ideas children may initially have about technology and engineering The Handbook of Research on Using Educational Robotics to Facilitate Student Learning is an edited book that advocates for a new approach to computational thinking and computing education with the use of educational robotics and coding apps The book argues that while learning about computing young people should also have opportunities to create with computing which have a direct impact on their lives and their communities It develops two key dimensions for understanding and developing educational experiences that support students in engaging in computational action 1 computational identity which shows the importance of young people s development of scientific identity for future STEM growth and 2 digital empowerment to instill the belief that they can put their computational identity into action in authentic and meaningful ways Covering subthemes including student competency and assessment programming education and teacher and mentor development this book is ideal for teachers instructional designers educational technology developers school administrators academicians researchers and students Research on Mathematics Textbooks and Teachers' Resources Lianghuo Fan,Luc Trouche,Chunxia Qi,Sebastian Rezat,Jana Visnovska,2018-02-13 This book focuses on issues related to mathematics teaching and learning resources including mathematics textbooks teacher guides student learning and assessment materials and online resources The book highlights various theoretical and methodological approaches used to study teaching and learning resources and addresses the areas of resources teachers and students at an international level As for the resources the book examines the role textbooks and other

curricular or learning resources play in mathematics teaching learning and assessment It asks questions such as Could we consider different types of textbooks and roles they play in teaching and learning How does the digitalization of information and communication affect these roles What are defining features of e textbooks and how could we characterize the differences between the traditional textbooks and e textbooks As for the teachers the book discusses the relationships between teachers individual and collective resources and the way in which we could model such relationships Specific questions addressed are What is the role of teachers in developing textbooks and other teaching and learning materials What are the relationships between resource designers and users What are the consequences of these changing roles and relationships for the teaching of mathematics and for teacher knowledge and professional development As for the students the book explores how students as well as their teachers interact through resources It raises and addresses questions such as What are the effects of modern ICT particularly internet on students use and the design of resources How do changing patterns of use and design affect student behaviour learning and relationships to the subject of mathematics
