Educational Binds of Poverty Ceri Brown, 2014-12-17 Shortlisted for BBC Radio 4's Thinking Allowed's second Ethnography Awards in partnership with the British Sociological Association Educational Binds of Poverty tackles the assumptions made by many recent social and educational policy initiatives suggesting that the best way to improve educational prospects of children in poverty is through an increased emphasis upon a culture of control discipline regulation and accountability In this book Ceri Brown presents these assumptions against a review of the research literature and an original ethnographic longitudinal study into the lives of children in poverty in order to highlight the gap between policy discourses and the lived experiences of children themselves Through the theoretical concept of a set of binds against educational success the book explores four key areas that children in poverty have to navigate if they are to be successful in school These are material deprivation the cultural contexts of school home and the community friendship and social capital the effects of student mobility through atypical school changes In seeking to characterise and explain what life is like for young school children this book questions why policy makers have a radically different frame of reference in purporting to understand how their policies will change the behaviour of those living in poverty This leads onto a consideration of what lessons may be learned in order to contribute towards a more appropriate policy agenda that attends to the multiple binds that children in poverty have to negotiate

Applications of Mass Spectrometry in Microbiology Plamen Demirev, Todd R. Sandrin, 2016-01-12 In the last quarter century advances in mass spectrometry MS have been at the forefront of efforts to map complex biological systems including the human metabolome proteome and microbiome All of these developments have allowed MS to become a well established molecular level technology for microorganism characterization MS has demonstrated its considerable advantage as a rapid accurate and cost effective method for microorganism identification compared to conventional phenotypic techniques In the last several years applications of MS for microorganism characterization in research clinical microbiology counter bioterrorism food safety and environmental monitoring have been documented in thousands of publications Regulatory bodies in Europe the US and elsewhere have approved MS based assays for infectious disease diagnostics As of mid 2015 more than 3300 commercial MS systems for microorganism identification have been deployed worldwide in hospitals and clinical labs While previous work has covered broader approaches in using MS to characterize microorganisms at the species level or above this book focuses on strain level and subtyping applications In twelve individual chapters innovators leaders and practitioners in the field from around the world have contributed to a comprehensive overview of current and next generation approaches for MS based microbial characterization at the subspecies and strain levels Chapters include up to date reference lists as well as web links to databases recommended software and other useful tools The emergence of new antibiotic resistant strains of human or animal pathogens is of extraordinary concern not only to the scientific and medical communities but to the general public as well Developments of

novel MS based assays for rapid identification of strains of antibiotic resistant microorganisms are reviewed in the book as well Microbiologists bioanalytical scientists infectious disease specialists clinical laboratory and public health practitioners as well as researchers in universities hospitals government labs and the pharmaceutical and biotechnology industries will find this book to be a timely and valuable resource
