ADEMCO 4204CF

SUPERVISED NOTIFICATION APPLIANCE MODULE

INSTALLATION AND SETUP GUIDE

GENERAL INFORMATION

The ADEMCO 4204CF Supervised Notification Appliance Module adds up to two Class B (Style Y) Supervised Notification Appliance Outputs to compatible ADEMCO Control Panels (for more information on Style Y, see NFPA-72 National Fire Alarm Code Chapter 3: Protected Premises Fire Alarm Systems). Refer to your Control Panel's installation instructions to determine if it supports this module. Each output is supervised using an EOL20.2K resistor (two resistors supplied).

UL For UL Commercial Fire installations, only one notification appliance module may be used, and only one notification appliance output (A or B) may be used on that module.

Each appliance output is rated at 1.2A max. You can power these outputs from the control panel or from a supplementary regulated UL Commercial Fire Alarm (power limited) power supply rated at 8-30VDC.

The 4204CF has a built-in cover tamper switch, which allows it to detect and report the removal of its cover to the Control Panel.

INSTALLATION

Mounting

UL • For dry, indoor use only. Do not install in air-handling spaces.
• For all fire (NFPA) and UL Commercial Burglary installations, the 4204CF must be tamper protected or mounted in a tamper-protected cabinet.

For fire alarm installations, mount the 4204CF inside a UL864 listed cabinet such as the control's cabinet. Cover tamper supervision is not required; to disable tamper supervision, set DIP switch Position 1 to the ON position.

1. Cover tamper supervision is not supported by all control panels. For other (i.e., non-fire alarm) installations, a separate enclosure is not required. Mount the 4204CF directly on a surface using the slotted holes located on the back of its housing (mounting screws provided). Feed the wires through the slot on the side on the side or through the breakout located on the back of the housing. Cover tamper supervision can be used, if supported by the control panel.

2. Affix the connections level (provided) to the inside of the 4204CF's cover.

REFER TO THE INSTALLATION INSTRUCTIONS FOR THE CONTROL WITH WHICH THIS DEVICE IS USED FOR DETAILS REGARDING THE ENTIRE ALARM SYSTEM.

Connections and Settings

Select and set an address for the 4204CF using its DIP switch settings as shown in Diagram 1. Assign a unique address to the 4204CF so that the control can communicate with it. Refer to the control's installation instructions to determine which address or range of addresses to use.

UL • For UL commercial and household fire installations, no more than one wire per terminal may be connected.
• **Use only 14-22AWG wire.**

Make connections to the control's keypad wiring by using the 4- position terminal block TB1, or the 4-pin plug (plug cable provided). Make connections to the Notification Appliance Power input and outputs via the module's 12-position terminal block (TB2). Refer to Diagrams 2, 3, and 4.

1. Only **relay 1** (Output A) and **relay 3** (Output B) may be programmed for activation. Refer to the control's installation instructions for programming output activation and supervision options.

2. When programming 4204CF output activation options in the control panel, outputs must not be programmed to "Close for 2 Seconds." Any other option may be used, but do not program the relay to "Stop" in less than 10 seconds.
