## Germany Since World War II:

World War II Memory and Contested Commemorations in Europe and Russia Jennifer A. Yoder, 2024-01-01

Instrumentalization of the wartime past for political gain is the subject of this study of eleven World War II commemorations. Using a comparative conceptually original approach, Yoder identifies the actors who manipulate memory surrounding wartime anniversaries such as the bombing of Dresden and ceremonies to honor fallen soldiers and fascist collaborators. The cases of memory contestation span three geographic regions: Western Europe, Eastern Europe, and Russia, recognizing that each developed distinctive interpretations of the war and different patterns of memory politics. This empirically rich study reveals the grievances that motivate memory challengers and their strategies for shaping the commemoration discourses and rituals. The memory challengers' toolkit includes varieties of emotional manipulation, subtle distortion, revisionism, and full-scale denial. The study finds that while there are differences in context and strategy across cases and regions, there are also areas of convergence. Moreover, a memory challenge in one country can spill over into others with serious consequences for foreign relations. While *World War II Memory and Contested Commemorations in Europe and Russia* deals with debates and narratives about events in the last century, its focus is on power, persuasion, and identity in the present. **Germany, Hitler, and World War II** Gerhard L. Weinberg, 1995-02-24 Reflecting on the greatest war in human history, one cannot help but think about the terrible conflict as a whole: its leaders, its peoples, and the puzzles still open about its conduct. Leaders on both sides realized that at stake from the very beginning was a complete restructuring of the world order. More than a conflict of imperial aggression, World War II was about who would live and command the globe's resources and which peoples would disappear entirely because they were believed to be inferior or undesirable by the victor. This collection of special studies in twentieth-century German and world history illuminates the nature of the Nazi system and its impact on Germany and the world. Bringing together essays now widely scattered and several never previously published in English, this volume examines the Holocaust, the connections between the European and Pacific theatres of war, as well as the effects, leaders, and research problems of World War II. By examining the effects of World War II, its leaders, its problems, and the Holocaust, this volume provides an illuminating study of the nature of the Nazi system and its impact on Germany and the world.
