Banegas, 2017-05-18 Trainees voices beliefs and experiences as learners shaped by the tension and dialogue between internal and external theories of teaching and learning inevitably penetrate the Initial English Language Teacher Education IELTE curriculum. Scrutinising these beliefs and experiences Initial English Language Teacher Education provides readers with vivid and informed accounts of IELTE from around the world. Approaching IELTE from a sociocultural perspective the authors analyse future teachers trajectories and educational histories in order to understand their experiences as learners. Unpack internal beliefs and problematise the relationships between such beliefs with theories and research in the field. Exploring accounts from a number of under researched contexts Initial English Language Teacher Education investigates and analyses perspectives from Argentina Brazil China Colombia Kenya Singapore South Africa Spain and Uruguay. Through the eyes of future teachers the chapters address issues such as trainee motivation tensions between theory and practice role of feedback teacher development and identity critical pedagogies online teacher education and intercultural awareness    [The Oxford Handbook of Program Design and Implementation Evaluation](#) Anu Rangarajan, 2023-10-13 The Oxford Handbook of Program Design and Implementation provides a comprehensive and actionable toolbox of evaluation approaches for examining programs across the life cycle from design and implementation all the way to scaling up successful interventions. This volume is a go to primary resource for social researchers faculty and students program practitioners policy analysts and funders interested in designing implementing or evaluating social programs    **Education in Singapore** Yew-Jin Lee, 2022-04-06

This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one stop reference guide to education and educational issues concerns here. There are three sections. Part 1 provides a sectorial overview of how education has been organized in this country such as preschool special needs primary and secondary and adult education divisions. In Part 2 contributors critically delve into issues and policies that are pertinent to understanding education here such as underachievement leadership language education assessment and meritocracy to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter history of Physical Education Art Music Geography Education etc in Singapore    [Building the Foundation: Whole Numbers in the Primary Grades](#) Maria G. Bartolini Bussi, Xu Hua Sun, 2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account. One of the main challenges of

designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level. Accordingly a focus area that is central to the discussion was chosen together with a number of related questions. The broad area of Whole Number Arithmetic (WNA) including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula. The study of this core content area is often regarded as foundational for later mathematics learning. However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country. As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts.

### **A Diversity of Pathways Through Science Education**

**Yann Shiou Ong, Timothy Ter Ming Tan, Yew-Jin Lee, 2024-06-18** This book presents the work of academics who contributed their work at the International Science Education Conference ISEC 2021 in alignment with the conference theme 2020 Vision for Science Education Research. Collectively the chapters aim to evoke intellectual dialogues on current and future trends in science education. It features chapters that are grouped thematically into three sections: Questions and Questioning in Science, STEM education, Developing Science Teaching and Assessment and History, Philosophy and Sociology of Science, Engineering and Informal Learning. Through the various sections the book presents empirical studies in science and engineering classrooms or laboratories, puts forward a framework for problem based learning, provides an account of a prominent scientist's efforts in promoting practical science through analysis of historical documents, and uncovers trends in informal science learning space research through a review of literature. Each section is introduced by a commentary with further insights and thought provoking questions on ideas raised in the chapters. The book also includes a Notes to Our Future Colleagues section in each chapter which presents readers with a collective vision for the state of science education research in the year 2050.

[International Perspectives on Early Childhood Education and Care](#) **Susanne Garvis, Sivanes Phillipson, Heidi Harju-Luukkainen, 2018-01-12** The first volume in this Early Childhood Education and Care in the 21st Century International Teaching Family and Policy Perspectives miniseries provides a snapshot of early childhood education and care from 19 different countries around the world. The intention is to provide a description for the policy and provision for young children and their families in each of the unique contemporary contexts. The selection of countries includes every continent in the world to provide variety across cultures, socio-economic status, location, population and other unique factors. Some chapters also share the development and history of early childhood in their country including economic and political transitions that lead to changes in early childhood provision and policy. The book provides essential takeaways for early childhood educators, researchers, early childhood organisations, policy makers and those interested to know more about early childhood education within an international perspective.
