2015 Provincial Time Table:

Regional Integration and Governance Reshuffling in the Making of China's City-Regions Xianchun Zhang,2023-08-07 This book for the first time thoroughly investigates the extent of economic and institutional integrations and the underlying governance reshuffling process of China's city regionalism. By using the Shenzhen Dongguan Huizhou sub region SDH in southern China as an empirical case this book provides convincing evidence that China's city regionalism is essentially a state orchestrated and institution based process. Perspectives from market industry infrastructure and multi level governance MLG have been provided to systematically examine China's city regionalism. This book has essentially made a definitive contribution to China's regional governance. Methodologically it shows how China's city regionalism can be examined through a problem solving and case by case paradigm through building a bridge between an empirical slogan and an inclusive theoretical term for institutional integration and through MLG and its integrative approaches in China. Exhilarating findings are presented using extensive tables graphs and maps along with the integration of quantitative and qualitative methods. Undergraduates graduates and researchers who are interested in China's city regionalism and regional governance would be the readership of the book and officers from different levels of government as well as policymakers will find the book inspiring.

Large Igneous Provinces and their Plumbing Systems R. K. Srivastava,R. E. Ernst,,K. L. Buchan,,M. De Kock,2022-03-15 Identification of large volume short duration mafic magmatic events of intraplate affinity in both continental and oceanic settings on the Earth and other planets provides invaluable clues for understanding several vital geological issues of current concern. Of particular importance is understanding the assembly and dispersal of supercontinents through Earth's history dramatic climate change events including mass extinctions and processes that have produced a wide range of large igneous province LIP related resources such as Ni Cu PGE Au U base metals and petroleum.
