

Alice in Wonderland Script

Scene: The Duchess's House

(Alice eats another part of the mushroom and shrinks down to a normal height. She wanders until she comes across the house of the Duchess. She enters and finds the Duchess, who is nursing a squealing baby. The Grinning Cheshire Cat and a Cook tossing pepper into a cauldron of soup are also present.)

Alice: Goodness! What a peculiar place.

Duchess: *(noticing Alice)* Well! Did you speak?

Alice: I'm afraid I did.

Duchess: *(to the baby)* Be off, you annoy me!

(The Duchess hands the baby to Alice, who discovers it's a pig.)

Alice: Oh, please don't let me keep it!

Duchess: Keep what?

Alice: Oh, I beg your pardon! It isn't a pig, it's only a—

Duchess: I quite agree with you. And the moral of that is—

(The Duchess leaves abruptly.)

Cheshire Cat: Cheshire Puss! Would you tell me, please, which way I ought to go from here?

Alice: That depends a good deal on where you want to get to.

Cheshire Cat: Oh, you're sure to do that, if only you walk long enough.

Alice: What sort of people live about here?

Cheshire Cat: In that direction *(pointing with paw)* lives a Hatter, and in that direction *(pointing with other paw)* lives a March Hare. Visit either you like: they're both mad.

Alice: But I don't want to go among mad people.

Cheshire Cat: Oh, you can't help that. We're all mad here. I'm mad. You're mad.

Alice: How do you know I'm mad?

ECRM2012-Proceedings of the 11th European Conference on Research Methods Rachel McClean,2012-01-01

Proceedings of the 11th European Conference on Research Methods in Bolton UK on 28 29 June 2011 New Journeys in Iberian Studies Mark Gant,Anneliese Hatton,Paco Ruzzante,2018-07-27 The research collected in this volume consists of 18 chapters which explore a number of key areas of investigation in contemporary Iberian studies As the title suggests there is a strong emphasis on trans national and trans regional approaches to the subject area reflecting current discourse and scholarship but the contributions are not limited by these approaches and include an eclectic range of recent work by scholars of history politics literature the visual arts and cultural and social studies often working in transdisciplinary ways The geographical scope of the transnational processes considered range from intra Iberian interconnections to those with the UK Italy and Morocco as well as transatlantic influences between the Peninsula and Argentina Cuba and Brazil The book opens up some pioneering new directions in research in Iberian studies as well as variety of fresh approaches to hitherto neglected aspects of more familiar issues

The Theatre of David Henry Hwang Esther Kim Lee,2015-12-17 The first

book to offer a comprehensive study of the Asian American playwright whose work has received critical commercial and substantial educational interest *The Vertebrate Integument Volume 2* Theagarten Lingham-Soliar,2015-02-18 The emphasis in this volume is on the structure and functional design of the integument The book starts with a brief introduction to some basic principles of physics mechanics including Newton's Three Laws of Motion These principles are subsequently used to interpret the problems animals encounter in motion It is in only the last 40 or so years that we have begun to understand how important a role the integument plays in the locomotion of many marine vertebrates This involves the crossed fiber architecture which was first discovered in a classic study on nemertean worms As a design principle we see that the crossed fiber architecture is ubiquitous in nature Research on some of the most dynamic marine vertebrates of the oceans tuna dolphins and sharks and the extinct Jurassic ichthyosaurs shows precisely how the crossed fiber architecture contributes to high speed swimming and in lamnid sharks may even aid in energy conservation However this design principle is not restricted to animals in the marine biota but is also found as far afield as the dinosaurs and most recently has been revealed as a major part of the microstructure of the most complex derivative of the integument the feather We see that a variety of phylogenetically diverse vertebrates take to the air by using skin flaps to glide from tree to tree or to the ground and present detailed descriptions of innovations developed in pursuit of improved gliding capabilities in both extinct and modern day gliders But the vertebrate integument had even greater things in store namely true or flapping flight Pterosaurs were the first vertebrates to use the integument as a membrane in true flapping flight and these interesting extinct animals are discussed on the basis of past and cutting edge research most intriguingly with respect to the structure of the flight membrane Bats the only mammals that fly also employ integumental flight membranes Classic research on bat flight is

reviewed and supplemented with the latest research which shows the complexities of the wing beat cycle to be significantly different from that of birds as revealed by particle image velocimetry The book's largest chapter is devoted to birds given that they make up nearly half of the over 22 000 species of tetrapods The flight apparatus of birds is unique in nature and is described in great detail with innovative research highlighting the complexity of the flight structures bird flight patterns and behavior in a variety of species This is complimented by new research on the brains of birds which shows that they are more complex than previously thought The feather made bird flight possible and was itself made possible by keratin contributing to what may be a unique biomechanical microstructure in nature a topic discussed in some depth A highly polarized subject concerns the origin of birds and of the feather Alleged fossilized protofeathers primal simple feathers are considered on the basis of histological and taphonomic investigative studies in Chapter 6 Finally in Chapter 7 we discuss the controversies associated with this field of research Professor Theagarten Lingham Soliar works at the Nelson Mandela Metropolitan University Port Elizabeth and is an Honorary Professor of Life Sciences at the University of KwaZulu Natal *Adaptation as Communication* Anne Furlong,2025-02-20 This book offers a consistent theoretically grounded accessible account of adaptation across a range of instances employing Relevance Theory as its explanatory framework and arguing that every adaptation is an independent communicative act The author establishes the principles of the study in the first part introducing and contextualising the theory developed by Sperber and Wilson before going on in the second part to demonstrate the strength of the approach and its relevance and utility within adaptation studies and beyond through a wide array of examples The volume will open up discussion in areas previously underserved by adaptation studies and consider broader implications such as where we draw the line when we think about adaptation This book will be of interest to students and scholars in a range of fields including adaptation studies relevance theory linguistic pragmatics stylistics narratology intertextuality literature and film studies *Abjection Incorporated* Maggie Hennefeld,Nicholas Sammond,2020-01-17 From the films of Larry Clark to the feminist comedy of Amy Schumer to the fall of Louis C K comedic graphic and violent moments of abjection have permeated twentieth and twenty first century social and political discourse The contributors to *Abjection Incorporated* move beyond simple critiques of abjection as a punitive form of social death illustrating how it has become a contested mode of political and cultural capital empowering for some but oppressive for others Escaping abjection's usual confines of psychoanalysis and aesthetic modernism core to theories of abjection by thinkers such as Kristeva and Bataille the contributors examine a range of media including literature photography film television talking dolls comics and manga Whether analyzing how comedic abjection can help mobilize feminist politics or how expressions of abjection inflect class race and gender hierarchies the contributors demonstrate the importance of competing uses of abjection to contemporary society and politics They emphasize abjection's role in circumscribing the boundaries of the human and how the threats abjection poses to the self and other far from simply negative open up possibilities for radically new politics Contributors
