Accessible Algebra Anne Collins, Steven Benson, 2023-10-10 Accessible Algebra 30 Modules to Promote Algebraic Reasoning Grades 7-10 is for any pre algebra or algebra teacher who wants to provide a rich and fulfilling experience for students as they develop new ways of thinking through and about algebra. The book includes 30 lessons that identify a focal domain and standard in algebra then lays out the common misconceptions and challenges students may face as they work to investigate and understand problems. Authors Anne Collins and Steven Benson conferred with students in real classrooms as the students explained what problem solving strategies they were using or worked to ask the right questions that would lead them to a deeper understanding of algebra. Each scenario represents actual instances of an algebra classroom that demonstrate effective teaching methods, real life student questions and conversations about the problems at hand. Accessible Algebra works for students at every level. In each lesson there are sections on how to support struggling students as well as ways to challenge students who may need more in depth work. There are also numerous additional resources including research articles and classroom vignettes.

A Graphical Approach to College Algebra John Hornsby, Margaret L. Lial, Gary K. Rockswold, 2002-06 This major revision reflects the authors' combined years of experience as classroom teachers and underscores their enthusiasm for the use of the graphing calculator as a teaching tool. Their approach is to present the various classes of functions, examine the nature of its graph, and discuss the analytic solution of equations based on that function. Then graphical support for the solution is provided with a graphing calculator. Using graphing technology to study math has opened up a new area of error analysis so the authors have included a What Went
