power cargo ships and the gas turbines that propel jet engines Smil argues are more important to the global economy than any corporate structure or international trade agreement Smil compares the efficiency and scale of these two technologies to prime movers of the past including the sail and the steam engine The lengthy processes of development commercialization and diffusion that the diesel engine and the gas turbine went through he argues provide perfect examples of gradual technical advances that receive little attention but have resulted in epochal shifts in global affairs and the global economy
