Monotonic and Ultra-Low-Cycle Fatigue Behaviour of Pipeline Steels António Augusto Fernandes, Abílio M.P. de Jesus, Renato Natal Jorge, 2018-06-15 This book covers the development of innovative computational methodologies for the simulation of steel material fracture under both monotonic and ultra low cycle fatigue. The main aspects are summarised as follows i Database of small and full scale testing data covering the X52 X60 X65 X70 and X80 piping steel grades. Monotonic and ULCF tests of pipe components were performed buckled and dented pipes, elbows and straight pipes ii New constitutive models for both monotonic and ULCF loading are proposed. Besides the Barcelona model, alternative approaches are presented such as the combined Bai Wierzbicki Ohata Toyoda model. iii Developed constitutive models are calibrated and validated using experimentally derived testing data. Guidelines for damage simulation are included. The book could be seen as a comprehensive repository of experimental results and numerical modeling on advanced methods dealing with Ultra Low Cycle Fatigue of Pipelines when subjected to high strain loading conditions

High Performance and Optimum Design

of Structures and Materials II S. Hernández, C.A. Brebbia, W.P. De Wilde, 2016-11-28 Containing papers from the 2nd High Performance Design of Structures and Materials and the Optimum Design of Structures conference following the success of a number of meetings since 1989 this book will be of interest to those in any engineering field. The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace/aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture. Most high performance structures require the development of a generation of new higher performance sustainable materials which can more easily resist a range of external stimuli or react in a non conventional manner. Emphasis is placed on intelligent structures and materials as well as the application of computational methods for their modelling, control and management. Optimisation problems of interest involve those related to size, shape and topology of structures and materials. Optimisation techniques have much to offer to those involved in the design of new industrial products. The development of new algorithms and the appearance of powerful commercial computer codes with easy to use graphical interfaces have created a fertile field for the incorporation of optimisation into the design process in all engineering disciplines. The book addresses the topic of design optimisation with welcomed contributions on numerical methods, different optimisation techniques and new software. Several of the topics covered are Composite materials and structures, Material characterisation, Experiments and numerical analysis, Transformable structures, Environmentally friendly and sustainable structures, Evolutionary methods in optimisation, Aerospace structures, Biomechanics application and Pneumatic structures

10th International Conference on FRP

Composites in Civil Engineering Alper Ilki, Medine Ispir, Pinar Inci, 2021-11-26 This volume highlights the latest advances, innovations and applications in the field of FRP composites and structures as presented by leading international researchers and engineers at the 10th International Conference on Fibre Reinforced Polymer FRP Composites in Civil Engineering CICE

held in Istanbul Turkey on December 8 10 2021 It covers a diverse range of topics such as All FRP structures Bond and interfacial stresses Concrete filled FRP tubular members Concrete structures reinforced or pre stressed with FRP Confinement Design issues Durability and long term performance Fire impact and blast loading FRP as internal reinforcement Hybrid structures of FRP and other materials Materials and products Seismic retrofit of structures Strengthening of concrete steel masonry and timber structures and Testing The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists

Mechanics of Soccer Heading and Protective Headgear Mohd Hasnun Arif Hassan,Zahari Taha,Iskandar Hasanuddin,Mohd Jamil Mohamed Mokhtarudin,2018-04-30 This short book provides a concise study of the mechanics of head impact in a soccer heading manoeuvre It describes the development and validation of finite element models of soccer ball and human head as well as the simulation of brain dynamics after ball to head impact In addition it also presents a computational study of the efficacy of wearing protective headgear in mitigating the risk of concussion due to heading in soccer

Fatigue and Fracture of Non-metallic Materials and Structures Andrea Spagnoli,2020-06-23 The mechanics of fracture and fatigue have produced a huge body of research work in relation to applications to metal materials and structures However a variety of non metallic materials e g concrete and cementitious composites rocks glass ceramics bituminous mixtures composites polymers rubber and soft matter bones and biological materials and advanced and multifunctional materials have received relatively less attention despite their attractiveness for a large spectrum of applications related to the components and structures of diverse engineering branches applied sciences and architecture and to the load carrying systems of biological organisms This book covers the broad topic of structural integrity of non metallic materials considering the modelling assessment and reliability of structural elements of any scale Original contributions from engineers mechanical materials scientists computer scientists physicists chemists and mathematicians are presented applying both experimental and theoretical approaches

Recent Trends in Cold-Formed Steel Construction Cheng Yu,2023-11-04 Recent Trends in Cold Formed Steel Construction Second Edition focuses on the application and use of this important construction material In this updated edition new chapters take on these developments offering updates on cutting edge new technologies and design methods for using cold formed steel as a structural material and providing technical guidance on how to design and build sustainable and energy efficient cold formed steel buildings Sections introduce codes specifications and design methods provide computational analysis of cold formed steel structures examine the structural performance of cold formed steel buildings and review thermal performance acoustic performance fire protection floor vibrations and blast resistance Over the last few years there has been major breakthroughs for cold formed steel design with modular building applications now becoming more widely accepted Other scientific developments include research on system reliability applications AI machine learning and the use of high strength steel as

well as new connection methods and changes in DSM codes Addresses building science issues and provides performance solutions for the design of cold formed steel buildings Provides guidance for using next generation design methods computational tools and technologies Edited by an experienced researcher and educator with significant knowledge on new developments in cold formed steel construction Covers new developments such as modular construction machine learning and code developments in Europe Australia and China **Recent Advances in Geotechnical Engineering, Volume 1** K.

Abaqus 613 Documentation Introduction

Abaqus 613 Documentation Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Abaqus 613 Documentation Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Abaqus 613 Documentation : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Abaqus 613 Documentation : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Abaqus 613 Documentation Offers a diverse range of free eBooks across various genres. Abaqus 613 Documentation Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Abaqus 613 Documentation Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Abaqus 613 Documentation, especially related to Abaqus 613 Documentation, might be challenging as they're often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Abaqus 613 Documentation, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Abaqus 613 Documentation books or magazines might include. Look for these in online stores or libraries. Remember that while Abaqus 613 Documentation, sharing copyrighted material without permission is not legal. Always ensure you're either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Abaqus 613 Documentation eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites.
