Consequently, the results of the present study suggest that the use of a single, low-dose, oral, short-acting PDE5 inhibitor may be a safe and effective treatment for patients with mild to moderate hypertension.

They are not the same, however, because the former is a generalization, while the latter is a specific instance of the former.

Other than a few minor differences, the following are the main differences between the two versions of the software. The differences are minor, but they are significant enough to warrant a separate section.
