*Draft Governance Manual for AAITG as a National NGO Affiliated to ActionAid International ,2006* Natural Resource Governance Khaled Yasin Rashid,2012 With reference to Bangladesh **International Encyclopedia of Civil Society**

Helmut K. Anheier,Stefan Toepler,2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field **International Handbook of Population and**

**Environment** Lori M. Hunter,Clark Gray,Jacques Véron,2022-02-07 This handbook presents a timely and comprehensive overview of theory data methods and research findings that connect human population dynamics and environmental context It presents regional summaries of empirical findings on migration and environmental connections and summarizes environmental impacts of migration such as urbanization and deforestation It also offers background on the health implications of environmental conditions such as climate change natural disasters scarcity of natural resources as well as on resource scarcity and fertility gender considerations in population and environment and the connections between population size growth composition and carbon emissions This handbook helps readers to better understand the complexities within population environment connections in addition to some of the opportunities and challenges within environmental demography As such this collection is an invaluable resource for students researchers and policy analysts in the areas of demography migration fertility health and mortality as well as environmental global and development studies **NGO**

**Accountability** Lisa Jordan,Peter van Tuijl,2012-05-04 As the fastest growing segment of civil society as well as featuring prominently in the global political arena NGOs are under fire for being unaccountable But who do NGOs actually represent Who should they be accountable to and how This book provides the first comprehensive examination of the issues and politics of NGO accountability across all sectors and internationally It offers an assessment of the key technical tools available including legal accountability certification and donor based accountability regimes and questions whether these are appropriate and viable options or attempts to roll back NGOs to a more one dimensional function as organizers of national and global charity Input and case studies are provided from NGOs such as ActionAid and from every part of the globe including China Indonesia and Uganda In the spirit of moving towards greater accountability the book looks in detail at

innovations that have developed from within NGOs and offers new approaches and flexible frameworks that enable accountability to become a reality for all parties worldwide     **Youth Mainstreaming in Development Planning**  
Commonwealth Secretariat,2017-07-24 Youth Mainstreaming in Development Planning Transforming Young Lives is a compendium of concepts to initiate dialogue and mobilise consensus around visions and strategies for young people and includes practical tools and techniques that will support initiatives to mainstream youth rights voices and capabilities across government and other institutions It is aimed policy makers and practitioners in all sectors engaged in development planning at all levels     The Companion to Development Studies Vandana Desai,Robert B. Development Studies is an essential one stop reference for anyone with an interest in development studies Over 100 international experts have been brought together to present a comprehensive overview of the key theoretical and practical issues dominating contemporary development studies Building on the success of the first edition the second edition of the Companion has been thoroughly revised and updated and includes new chapters on a range of topics including ageing culture and development corruption and development and global terrorism Each chapter summarises current debates and provides guidance for further reading and research The Companion to Development Studies is indispensable for students of development studies at all levels from undergraduate to postgraduate and beyond in departments of development studies geography politics international relations sociology social anthropology and economics     *Journal of Nigerian Government and Politics* ,2012-03

*International Accounting and Reporting Issues* ,2003     **Nourish South Asia: Growing a better future for regional food justice** Swati Narayan,     **Just Security in an Undergoverned World** William Dutsch,Joris Larik,Richard Ponzio,2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose

people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance    Yearbook of International Organizations 2001-2002 K G Saur Books,2001

**When the Law is Not Enough** Christopher Tanner,Marianna Bicchieri,2014 The Mozambique land law provides statutory recognition of customary land rights and is considered one of the most progressive legislations in Africa However the law continues to face implementation challenges including the realization of equal rights for women and institutional reform Simply having a progressive law is not enough to bring about transformative change in a country Recognizing these challenges the Food and Agriculture Organization of the United Nations FAO developed a programme to support the legislation through the capacity development of both direct beneficiaries and those responsible for implementing it This publication presents an overview of how this programme developed and what it has achieved to date It highlights the lessons learned from this core element of FAO's long history of support to the land programme in Mozambique In particular the study discusses the challenges facing land and natural resources paralegals in Mozambique today and helps to define the parameters for programme assessment by looking at paralegals in different country contexts It describes how the programme has included training and capacity development not just for NGO sponsored paralegals but also for district and local government level officials justice system officers and staff from public sectors working with land and natural resources
