API 610, the standard specifies requirements for Centrifugal Pumps, including pumps running in reverse as hydraulic power recovery turbines (HPRTs), for use in petroleum, petrochemical, and gas industry process services. Latest 12th Edition has just been released in the last week of January, 2021.

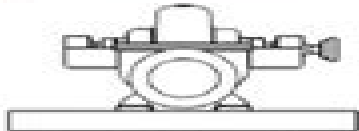

Key features and major changes of 12th edition, are highlighted in this write up with the objective to support Pump professionals with quick overview who already know about the API 610, 11th edition, which is 10 years old. You may not find many fundamental and important recommendations in this article, if those are the same as 11th edition. Reference of API section is provided in parenthesis.
