The Routledge International Handbook of Critical Education Michael W. Apple, Wayne Au, Luis Armando Gandin, 2009-02-17 The Routledge International Handbook of Critical Education is the first authoritative reference work to provide an international analysis of the relationship between power, knowledge, education and schooling. Rather than focusing solely on questions of how we teach efficiently and effectively, contributors to this volume push further to also think critically about education's relationship to economic, political and cultural power. The various sections of this book integrate into their analyses the conceptual, political, pedagogic and practical histories, tensions and resources that have established critical education as one of the most vital and growing movements within the field of education, including topics such as social movements and pedagogic work, critical research methods for critical education, the politics of practice and the recreation of theory, the Freirian legacy. With a comprehensive introduction by Michael W. Apple, Wayne Au and Luis Armando Gandin, along with thirty-five newly commissioned pieces by some of the most prestigious education scholars in the world, this Handbook provides the definitive statement on the state of critical education and on its possibilities for the future.

Teaching Virtues Donald Trent Jacobs, Jessica Jacobs-Spencer, 2001-04-04 This book about teaching virtues is based on a fundamental American Indian view that sees the universe as intimate relationships of living things that are vitally affected by attributes called universal virtues. These virtues cross all boundaries and cannot be taught in isolation. They are woven into all subjects that are worth learning. Part 1 provides psychological perspectives that underpin the book's approach. Part 2 shows how various pedagogical strategies can turn subject matter into significant relationships. Since teaching virtues is ultimately about relationships, a natural way to embed awareness of virtues unfolds when there is a consistent commitment to teaching virtues daily. Chapters introduce the lesson plan format and the conceptual model, explore the meanings of vital terminology and discuss assessment strategies. Part 3 realizes the actual interconnections between virtues and content knowledge with chapters that address social studies, language arts, science, physical education, mathematics and the arts. These chapters show how the process works to truly integrate content and character education. Part 4 offers an opportunity for profound reflection on the issues and challenges surrounding effective character education. Contains 75 references. TD

Teaching Literacy in Fifth Grade Susan I. McMahon, Jacqueline Wells, 2006-11-15 For students fifth grade is a time of increasing independence and responsibility. Yet fifth graders vary widely in their reading and writing abilities and they are still young enough to require considerable teacher support. Depicting an exemplary teacher in action this indispensable book presents innovative practical strategies for creating an organized, motivating and literacy rich fifth grade classroom. The authors show how to assess student needs and implement standards based instruction that targets comprehension, vocabulary, writing, genre study and other crucial areas. Grounded in current best practices the book includes helpful planning tips, illustrations and reproducibles.

Teaching the Scientific Method Millie Blandford, 2004 Grab your students' attention with an exciting science demonstration. Then engage them in active learning as they explore each step of the scientific method. This is a perfect way to introduce and guide students in creating science fair projects and learning the concepts of scientific investigation.

Creating Your Teaching Portfolio: Presenting Your Professional Best Patricia Rieman, Jeanne Okrasinski, 2007 This portfolio handbook includes authentic student generated artifacts as well as insights from administrators, teachers and parents. Issues of classroom management, diversity, communication, planning, standards based education and reflection are all addressed in the context of how to approach these important aspects within a teaching portfolio and during interviews. The materials are designed for continued use as the students become in-service educators.

Lessons for a Scientific Literature Review Randell K. Schmidt, Maureen M. Smyth, Virginia K. Kowalski, 2008 Based on a collaborative inquiry based project co-conducted and graded by science teachers and school librarians at Gill St. Bernard's School this book presented in workshop format furnishes all the material necessary to enable school librarians and high school science teachers to collaboratively teach the important topic of how to perform and write up a scientific literature review. Students choose a topic of personal interest linked to their science class subject(s). The school librarian and science teachers instruct students in how to perform the necessary research and how to successfully integrate the new information into a final product. This book will present an overview of the project including a discussion of the value of inquiry based research, detailed project lessons, student assignments and a concluding discussion of unit assessment.
