

Steps to Writing an Article Review

1

Define an article audit review: This review is, to sum up, the quintessence of the article, its key contentions, and discoveries, and the writer's disposition towards the topic

2

Plan your work on the review: You should know precisely how you will compose your article review before you even read the article being referred to

3

Get a snappy look at the article: Peruse the article's title, abstract, headings

4

Read the article attentively: Deliberately read the article a few additional occasions

5

Retell the article to yourself: It is best to write an outline or a piece of free writing

6

Layout your review: Take a look at your synopsis to check whether the author was clear about every one of them

7

Think about a title for your composition: The title of your review should hint at its focus

8

Cite the article that you are reviewing: Make sure to utilize the predefined reference style (APA, ASA, Chicago/Turabian, MLA)

Commonality and Individuality in Academic Discourse Maurizio Gotti, 2009 This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing. Despite the standardising pressure of cultural and language related factors, academic communication remains in many ways a highly personal affair with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional institutional social and individual identities of its members. The first section of the volume deals with tensions involving individual collective values and the analysis of collective vs individual discoursal features in academic discourse. The second section comprises longitudinal investigations of the academic output of single scholars so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community. The third part deals with genres that are meant to impose commonality on the members of an academic community not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication.
