documents and procurement cycle as well as how the banks ensure competition and value for money in funded procurements. The book also examines the banks' approach to sustainability concerns in public procurement such as environmental, social or industrial concerns as well as how the banks address the issue of corruption and fraud in funded contracts. Another issue that is addressed by this book is how the banks have implemented the aid effectiveness agenda. It will be seen that the development banks have undertaken steps to harmonise their policies and practices, increased borrower procurement capacity, taken steps to reduce the tying of aid and play an important role in the reform of borrower procurement systems all in an effort to improve the effectiveness of development finance. The book also considers the contractual and other remedies that are available to parties that may be aggrieved as a result of a funded procurement. The book analyses, compares and contrasts the legal, practical and institutional approaches to procurement regulation in the World Bank, the Inter American Development Bank, the African Development Bank, the Asian Development Bank and the European Bank for Reconstruction and Development.

Smart procurement aims to leverage public buying power in pursuit of social, environmental and innovation goals. Socially orientated smart procurement has been a controversial issue under EU law. The extent to which the Court of Justice (ECJ) has supported or rather constrained its development has been intensely debated by academics and practitioners alike. After the slow development of a seemingly permissive approach, the ECJ case law reached an apparent turning point a decade ago in the often criticised judgments in *Rffert* and *Laval*, which left a number of open questions. The more recent judgments in *Bundesdruckerei* and *RegioPost* have furthered the ECJ case law on socially orientated smart procurement and aimed to clarify the limits within which Member States can use it to enforce labour standards. This case law opens up additional possibilities but it also creates legal uncertainty concerning the interaction of the EU rules on the posting of workers, public procurement and fundamental internal market freedoms. These developments have been magnified by the reform of the EU public procurement rules in 2014. This book assesses the limits that the revised EU rules and the more recent ECJ case law impose on socially orientated smart procurement and more generally critically reflects on potential future developments in this area of intersection of several strands of EU economic law.
