**Storyline:** Based on the true story of the ill-fated 13th Apollo mission bound for the moon. Astronauts Lovell, Haise and Swigert were scheduled to fly Apollo 13, but are diverted up to 13. The MPD, and The LGS have already achieved their lunar Sampling-goal, so there's little interest in this "routine" flight. until that is, things go very wrong, and one of a safe return fails. — Taken from [imdb.com](http://www.imdb.com)

Just a little background information:

Typical space missions (of travelling to space can even be called "typical") begin from Cape Canaveral, Florida. Mission Control, where engineers and experts work in command and communication with astronauts, was located in Houston, Texas. After re-entering into the earth's atmosphere, the equipment and men would land in the Pacific Ocean.
