**The Art of Uncertainty** David Spiegelhalter, 2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we re trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In The Art of Uncertainty he shows how we can become better at dealing with what we don t know to make smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what s likely to happen in the future Along the way we learn how a misinterpretation of a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don t or simply cannot know *Equality and Differentiation in*

*Marketised Higher Education* Marion Bowl, Colin McCaig, Jonathan Hughes, 2018-05-24 This edited collection demonstrates how discourses and practices associated with marketisation differentiation and equality are manifested in UK higher education today Uniting leading scholars in higher education and equality in England the contributors and editors expose the contradictions arising from the tension between aims for increased equality and an increasingly marketised higher education As the authors seek to reveal both the intended and unintended consequences of the intensified marketisation of the sector they critically examine the implications of these changes In doing so they reveal the ways in which institutional policy and discourse are involved in masking the contradictions between an educational marketplace and education as a vehicle for advancing equality and social justice This pioneering volume will be of interest and value to students and scholars of higher education in England education policy and the marketisation of higher education as well as policy makers and practitioners
