Automobile Engineering Babu A.K. & Singh Ajit Pal, This book is designed for students undertaking a subjects Automobile Engineering in Mechanical Engineering Degree as per the latest revised syllabus of all Indian Universities

Research Avenues in Mechanical and Automobile Engineering Quazi T. Z, Baviskar Devakant, 2023-06-22 The aim of this book is to explore avenues in the field of mechanical and automobile engineering 21st century witness rapid growth in the diversified areas of industry 4.0 having a good impact on the technological advancement. Technology has enabled mechanical engineers to develop more efficient and effective solutions to complex problems. With advances in technology new materials and innovative ideas mechanical engineers are set to make a big impact in the future. Here are some of the technologies that are changing the industry. With the development of new technologies and the increasing demand for more efficient and sustainable products mechanical engineers will continue to be at the forefront of innovation along with Automation, 3D printing, Robotics, Artificial intelligence, Nanotechnology, Computer Aided Engineering, Internet of Things. New technology is being used in the automobile that is now being designed and are adding more convenience and are allowing more improvement in the customer's experience. There are many impacts that have been made by technology on the automobile industry. Automobiles have become more advanced since they were first created and automobile manufacturers are adapting to advanced Technologies which incorporates a lot of automobile factors like car design, car sales and marketing and servicing. This has drastically reduced the cost of production for the automobiles and at the same time it has helped in the increase of the production volume which means now there is more output with the same given number of input. With the use of technology in the automotive industry manufacturing automobiles has become much easier than you think. Now you are witnessing automobiles being made up by the robots and there are automated processes for the manufacturing of vehicles. Through this factor automakers are able to comply with the demand and achieve the satisfaction of the customer at the same time. The use of Technology is also spread to parts manufacturing which is resulting in easy access to the replacement parts of the automobile from the customers.
