**Society, Theory and the French Revolution** Brian Singer, 1986-09-08

This is a very different book about the French Revolution of 1789-94. The concern is less with a change in society than a change in the relation that a society establishes with itself. Here the focus is on society's presentation and representation considered not simply from the perspective of a few privileged intellectuals but as a social and historical process inseparable from the institution of society's political dimension. Through a close reading of the revolutionary texts of the period, the author is able to trace behind the surface of events and conflict themes of a more abstract fundamental character: themes relative to the discovery of society, the construction of the nation-state and what for the revolutionaries was the scandal of their separation. While retaining a fidelity to the eighteenth century, this book opens up new theoretical perspectives that illuminate the character of both a certain revolutionary heritage and a more general political modernity. *Pre-text, Text, Context* Robert L. Mitchell, 1980. The nineteenth century in France is a nightmare for literary historians. Their thirst for categorization is more easily quenched by prior centuries to which, because they seem unified by cohesive preoccupations and common goals such as appellations as the Renaissance, the Classical Age or *le grand siècle* and the Enlightenment or Age of Ideas are appropriately applied. For the protean nineteenth century, for which no such handy tag has been or can be devised, is beyond all else distinguished by extreme heterogeneity and eclecticism. A period of chaotic social and political instability of scientific and industrial revolution, it is in literature a time not of solidarity but of unprecedented individualism. Collective social consciousness yields to isolated probings into the uncharted recesses of the human mind and soul and revolt against standardized even valorized literary practice is seen in such developments as the slow undermining of the accepted literary lexicon and of the qualities of unity, clarity and reason and in a radical overhauling of the system of prosody. If such diversity precludes coherence in nineteenth-century French literature, it can itself be recognized as the organizing element of this literary epoch. And it is precisely this paradox that the essays in this volume intend to reflect. They are not unified as orthodoxy might dictate by a common approach or theme or author. Rather, they are marked as was the century that is their context by divergence and variety, not harmony and consistency. Multiformity in theme is reflected in discussions of such varied topics as pygmalionism, allegory, mirage, self-consciousness, plagiarism, madness, feminism, the grotesque, dance and alchemy, which are addressed in turn from a variety of critical approaches: thematic, intertextual, historical, stylistic, psychocritical, sociological and semiotic. Eclecticism indeed has shaped the basic conception of the collection. Part 1 examines themes presented as pretext that inform either authorial motivation or the orientation of a text prior to its actual inscription. Part 2 approaches the process of writing from the perspective of the text itself. And Part 3 is concerned with those spatial, temporal and linguistic elements of context that surround the literary text. **Representing the Holocaust** Dominick LaCapra, 2016-11-01. Defying comprehension, the tragic history of the Holocaust has been alternately repressed and canonized in postmodern Western culture. Recently, our interpretation of the Holocaust has been the center of bitter controversies from debates over Paul de Man's collaborationist journalism and Martin Heidegger's Nazi past to attempts by

some historians to downplay the Holocaust's significance. A major voice in current historiographical discussions, Dominick LaCapra brings a new clarity to these issues as he examines the intersections between historical events and the theory through which we struggle to understand them. In a series of essays, three published here for the first time, LaCapra explores the problems faced by historians, critics, and thinkers who attempt to grasp the Holocaust. He considers the role of canon formation and the dynamic of revisionist historiography as well as critically analyzing responses to the discovery of de Man's wartime writings. He also discusses Heidegger's involvement with National Socialism and he sheds light on postmodernist obsessions with such concepts as loss, agora, dispossession, deferred meaning, and the sublime. Throughout, LaCapra demonstrates that psychoanalysis is not merely a psychology of the individual but that its concepts have sociocultural dimensions and can help us perceive the relationship between the present and the past. Many of our efforts to comprehend the Holocaust, he shows, continue to suffer from the traumatizing effects of its events and require a working through of that trauma if we are to gain a more profound understanding of the meaning of the Holocaust.

**Fictions of the French Revolution** Bernadette Fort, 1991.

**Landscape Painting in Revolutionary France** Steven Adams, 2019-09-25. The French Revolution had a marked impact on the ways in which citizens saw the newly liberated spaces in which they now lived. Painting, gardening, cinematic displays, landscape travel guides, public festivals, and tales of space flight and devil abduction each shaped citizens' understanding of space. Through an exploration of landscape painting over some 40 years, Steven Adams examines the work of artists, critics, and contemporary observers who have largely escaped art historical attention to show the importance of landscape as a means of

crystallising national identity in a period of unprecedented political and social change
