hospitals and healers this meeting point in the opinion of the author should be how best to serve the interests of the patients The best form of relationship that should exist between hospitals and healers is also discussed The two systems of medicine exist side by side in Nigeria and most African countries yet remain functionally unrelated in any intentional sense It is argued that no medical system is perfect and no single care system has all the answers to all human health and related problems Each of the two systems has its strong and weak points The often talked about integration of the two systems has potential pitfalls and may be undesirable The book concludes that the best form of relationship may well be one of genuine cooperation and mutual respect between the two systems since this will lead in the ultimate to advancement of medical knowledge and overall improvement of patient care All levels of government in Nigeria have decisive roles to play in achieving this mutually beneficial cooperation of the two systems *Children* ,1958 **Architectural Record** ,1948 **Instructors Manual of**
