

An extensive test programme led to the development and certification of an optional kit for the T77, including deflation valves on the main and towed-hyge bags, an alternate restraint thrust on the seatbelts of the aircraft, protection on the towed-hyge bags and for the hydraulic brake line and the speed brake control system, strengthening of the VIBI, D800 and ATC vessels on the underside of the fuselage and vertical struts (a "blow-away pin" through the engine bracket. The deflation on the forward-retracting nose wheel is of such nature that it cannot be forced in the normal wheel well and

Reising took the document to himself as third jet transport before the 50th and 155th in November 1944, although the formal commitment to put the new type into production had to wait until final military orders were forthcoming. In the event, the point was reached on 14 February 1945 when the German military Luftwaffe announced a contract for 75 He 163s for a year, including spares, of about £100,000 (£1.2 million in 1984). The launch decision came after a period of intensive discussion.

Advancements in Electric Machines J. F. Gieras, 2008-11-14 Traditionally electrical machines are classified into d c commutator brushed machines induction asynchronous machines and synchronous machines These three types of electrical machines are still regarded in many academic curricula as fundamental types despite that d c brushed machines except small machines have been gradually abandoned and PM brushless machines PMBM and switched reluctance machines SRM have been in mass production and use for at least two decades Recently new topologies of high torque density motors high speed motors integrated motor drives and special motors have been developed Progress in electric machines technology is stimulated by new materials new areas of applications impact of power electronics need for energy saving and new technological challenges The development of electric machines in the next few years will mostly be stimulated by computer hardware residential and public applications and transportation systems land sea and air At many Universities teaching and research strategy oriented towards electrical machinery is not up to date and has not been changed in some countries almost since the end of the WWII In spite of many excellent academic research

achievements the academia industry collaboration and technology transfer are underestimated or quite often neglected Underestimation of the role of industry unfamiliarity with new trends and restraint from technology transfer results with time in lack of external nancial support and drastic cline in the number of students interested in Power Electrical Engineering
