## **Altered States Volume I:**

Altered States of Consciousness Marc Wittmann, 2018-09-04 What can altered states of consciousness tell us about the mystery of consciousness? A groundbreaking study of out of body experiences, drug intoxication, and shock, perfect for readers interested in psychedelics, psychology, and meditation. During extraordinary moments of consciousness, shock, meditative states, and sudden mystical revelations, out of body experiences, or drug intoxication, our senses of time and self are altered; we may even feel time and self dissolving. These experiences have long been ignored by mainstream science or considered crazy fantasies. Recent research, however, has located the neural underpinnings of these altered states of mind. In this book, neuropsychologist Marc Wittmann shows how experiences that disturb or widen our everyday understanding of the self can help solve the mystery of consciousness. Wittmann explains that the relationship between consciousness of time and consciousness of self is close; in extreme circumstances, the experiences of space and self intensify and weaken together. He considers the emergence of the self in waking life and dreams, how our sense of time is distorted by extreme situations ranging from terror to mystical enlightenment, the experience of the moment, and the loss of time and self in such disorders as depression, schizophrenia, and epilepsy. Dostoyevsky reported godly bliss during epileptic seizures; neurologists are now investigating the phenomenon of the epileptic aura. Wittmann describes new studies of psychedelics that show how the brain builds consciousness of self and time and discusses pilot programs that use hallucinogens to treat severe depression, anxiety, and addiction. If we want to understand our consciousness, our subjectivity, Wittmann argues, we must not be afraid to break new ground. Studying altered states of consciousness leads us directly to the heart of the matter: time and self, the foundations of consciousness. ALTERED STATES (English Edition) Paddy

Chayefsky, 2022-01-19 Edward Jessup, a young psycho-physiologist, experiments with different states of consciousness, obsessed with an addiction to truth and knowledge. He injects himself with psychedelic drugs, lies locked in an isolation tank, and experiences all the stages of pre-human consciousness until, finally, terrible changes take place with him. Jessup also physically transforms into a pre-human being. His thirst for knowledge drives him into ever new, increasingly irreversible transformations. Only the horror when his body begins to dissolve into pure energy brings him back to human bonds. Paddy Chayefsky, January 29, 1923 – August 1, 1981, one of the most important US dramatists, wrote a breath-taking, equally philosophical shocker with his debut novel. In 1980, British director Ken Russell adapted the novel based on Paddy Chayefsky's screenplay, starring William Hurt, Blair Brown, and Drew Barrymore. Altered States Anita Brookner, 2016-05-19 I was foolish enough to think that I was strong enough and cheerful enough by nature to avoid unhappiness. I was not yet old enough to see that I was in error. Alan Sherwood is a cautious, solitary London solicitor who finds himself obsessed by his glamorous cousin Sarah. But Sarah is self-seeking and predatory, and their short-lived affair leaves Alan desolate. He finds distraction in Angela, a homely, needy acquaintance of Sarah, and they drift into marriage.
