**Replies from Biological Research** Román de Vicente,1979      **The Alternative Introduction to Biological Anthropology** Jonathan M. Marks,2018 In The Alternative Introduction to Biological Anthropology Second Edition author Jonathan Marks presents an innovative framework for thinking about the major issues in the field with fourteen original essays designed to correlate to the core chapters in standard textbooks Each chapter draws on and complements but does not reconstitute except for the sake of clarity the major data and ideas presented in standard texts Marks explores such topics as how we make sense of data about our origins where our modern ideas come from our inability to separate natural facts from cultural facts and values as we try to understand ourselves and the social and political aspects of science as a culturally situated mental activity      **Science** John Michels (Journalist),1893      **Biology** James F. Appearances have presented the predictions delivered by Astraea daughter of Zeus and Themis devoted to human justice on Earth Themis was known as goddess of divine law The law of absolute principles of logic of endurance of humanity always would connect to rules of correctness Accordingly she would be real predecessor to the institution of Supreme Court Yet it seems exactly there we have to confront the other side into claiming and declaring what Supreme is and can possibly be on Earth What I found almost necessary is to point out that if anyone is to claim any legacy on anything it has to be clear what kind of legacy can be only acceptable to be claimed first of all I am to insist on the conception of licencing of the civilizational stamp of Earth as declared with in main civilizational declarations of present times of protectionism of civil rights while we still recognize the meaning of having a soul so no anyone can claim it and interpret it as one wants especially in the future I have on mind some kind of sealing of the cultural identities of the nations in terms of qualitative differences that each nation is making promoting further straightening of civilizational values as a consequence Origin with in such perspective does and will matter Yet I am trying to establish humanity with in its abstract dimension through the set of clear rules of civilizational conduct justice and exactness that than only we can call civilisation as it will be something on what our future generations can rely
