Financial Statements

Companies prepare four financial statements from the summarized accounting data:

1. An **income statement** presents the revenues and expenses and resulting net income or net loss for a specific period of time.
2. An **owner's equity statement** summarizes the changes in owner's equity for a specific period of time.
3. A **balance sheet** reports the assets, liabilities, and owner's equity at a specific date.
4. A **statement of cash flows** summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

These statements provide relevant financial data for internal and external users. Illustration 1-9 (page 22) shows the financial statements of Softbyte.

Learning Objective

Understand the four financial statements and how they are prepared.

International Note

The primary types of financial statements required by GAAP and IFRS are the same. In practice, some format differences do exist in presentations commonly employed by GAAP companies compared to IFRS companies.
