## Case Study Research in Accounting

David J. Cooper and Wayne Morgan

**SYNOPSIS:** We describe case study research and explain its value for developing theory and informing practice. While recognizing the complementary nature of many research methods, we stress the benefits of case studies for understanding situations of uncertainty, instability, uniqueness, and value conflict. We introduce the concept of *phronesis*—the analysis of what actions are practical and rational in a specific context—and indicate the value of case studies for developing, and reflecting on, professional knowledge. Examples of case study research in managerial accounting, auditing, and financial accounting illustrate the strengths of case studies for theory development and their potential for generating new knowledge. We conclude by disputing common misconceptions about case study research and suggesting how barriers to case study research may be overcome, which we believe is an important step in making accounting research more relevant.

### INTRODUCTION

Accounting research is periodically challenged about its practical relevance and its progressive scientific achievements (Reiter and Williams 2002; Hopwood 2007). Case studies can help researchers respond to these challenges and contribute to relevant knowledge. We use examples from financial and managerial accounting and auditing to show the value of case studies in making accounting research matter, both for the development of theory and for improving practice. In so doing, we identify four types of case study and show how each type can enhance accounting research and practice. We conclude by reflecting on some of the reasons that case study research may in fact be discouraged, and suggest some avenues to address this situation.

Most accountants are familiar with case studies in relation to teaching. They provide vivid examples that can be used for many purposes, not least to generate an appreciation of the way a general principle can be applied in specific, and often complex, settings. In this paper we concentrate on case studies for research purposes, showing how the benefits that are widely recognized for teaching purposes can also enhance accounting research. A crucial difference between teaching and research-oriented case studies is the central role of theory in the latter. Moreover, we show how research-oriented case studies are valuable for practitioners.

**Accounting Thought and Practice Reform** Frank Clarke,Graeme William Dean,Martin Persson,2018-10-09 Raymond John Chambers was born just over a century ago on 16 November 1917 It is more than fifty years since his first classic Accounting Evaluation and Economic Behavior was published more than forty since Securities and Obscurities Reform of the Law of Company Accounts republished in 1980 as Accounting in Disarray and over twenty since the unique An Accounting Thesaurus Five Hundred Years of Accounting They are drawn upon extensively in this biography of Chambers intellectual

contributions as are other of his published works. Importantly we also analyze archival correspondence not previously examined. While Chambers provided several bibliographical summaries of his work without the benefits of reviewing and interspersing the text with correspondence materials from the Chambers Archive, this study would lack an appreciation of the impact of his early childhood and nuances related to his practical including numerous consultancies and academic experiences. The semi biographical narrative codifies article and editorial length exercises by the authors drawing on parts of the archive related to theory development measurement and communication. Other parts are also examined. This allows us to respond to those critics who claim his reforms were naive. They further reveal a man of theory and practice whose theoretical ideas were solidly grounded on observations from his myriad interests and experiences. Many of his practical experiences have not been examined previously. This approach and the first book length biography differentiates this work from earlier analyses of Chambers' contribution to the accounting literature. American Accounting Association's 2021 Thomas J Burns Biographical Research Award winner, this book provides evidence to support the continued push for the reforms he proposed to accepted accounting thought and practice to ensure accounting is the serviceable technology so admired by Pacioli, Da Vinci and many other Renaissance pioneers. It will be of interest to researchers, educators, practitioners and regulators alike.
