

Homework Answers from ACE: Filling and Wrapping

ACE Investigation 1: #1 – 4, 10 – 13.

ACE Investigation 2: #4, 22.

ACE Investigation 3: #4 – 6, 13, 19.

ACE Investigation 4: #15, 25, 32.

ACE Investigation 5: #5 – 7, 10.

ACE Question	Possible Answer
ACE Investigation 1 In Exercises 1–4, tell whether the flat pattern could be folded along the lines to form a closed cubic box. If you are unsure, cut the pattern out of grid paper and experiment. 1.  2.  3.  4. 	This question gives students some practice with visualizing the manipulation of the flat pattern to make the 3-dimensional shape. (They have the opportunity to make this a concrete activity.) It also reinforces the concept that there are many ways to make flat patterns for the same cube. The usual cube or rectangular prism pattern takes advantage of the idea of opposite faces.  - Does not work because there are two "opposite" faces for the left face (marked with a large X). The furthest right face on the pattern and the face at the bottom of the pattern will overlap. - Will work (though it may take a concrete model to convince students). - Does not work. Again 2 faces overlap (these are marked with a large X). - Does work. Students will probably have to cut this out to convince themselves that this does work. It is difficult to keep track visually of which face is the bottom, front etc.
