Notes on Creativity

• Inspiration is everywhere, we just capture it with the stroke of a pen.

• We can find it by viewing things from a different vantage point, gaining a new perspective.

• Looking for the extraordinary in the everyday.

• Try to look closer at a bridge, see the world with a pair of glasses with that focus on detail. By just taking time to look around, noticing the small details, the little subtleties, it gives us the ability to bring it up at the opportunity. When the world is a system, then we can see it in a way no one else can, only then can we provide an idea out of the norm. By using this combination of the moment to find my focus.

• We can see the world in a different way.

• We know you don't like your boring time, so I'm going to give you some ideas.

• We can take you on a little adventure.

Ritchie Mined - Volume I Bill H. Ritchie,2018-05-03 Short summaries of 3 026 essays by Bill H Ritchie artist teacher and visionary drawn from his journals written between 1969 2009 He structured the headings of each article according an imaginary place he calls Emeralda imagining ten islands on a lake where he as a recipient of a mythical prize is encouraged to write freely about anything that seems important to an artist teacher and philosopher Mindful of the use of new technologies each essay summary has key index features which would allow a reader having a computer and optional CD ROM to retrieve the full text of any article Or using freely chosen keywords of their own find the articles which have those words in them

Knowing with New Media Lena Redman,2018-11-21 This cutting edge book considers how advances in technologies and new media have transformed our perception of education and focuses on the impact of the privatisation of digital tools as a mean of knowledge production Arguing that education needs to adapt to the modern learner the book's unique approach is based on a disassociation with the deeply ingrained attitude with which people have traditionally viewed education learning the existing symbolic systems of certain disciplines and then expressing themselves strictly within the operational modes of these systems The ways of knowledge production exploring recording representing making meaning of and sharing human experiences have been fundamentally transformed through the infusion of digital technologies into all aspects of human activity allowing learners to engage with their immediate natural social and cultural environments by capitalising on their individual abilities and interests This book proposes a new approach to teaching and learning termed cinematic bricolage which involves generating knowledge from heterogeneous resources in a do it yourself manner while making meaning through multimodal representations It shows how cinematic bricolage reconnects ways of knowing with ways of being empowering the individual with a sense of personal identity and responsibility helping to shape more aware social citizens
