View of the Present Situation of the United States of America. The earth is miles in circumference and by turning on its axis once in twenty four hours from west to east causes a continual succession of day and night according as either side is turned to or from the sun and occasions an apparent motion of the sun and heavenly bodies from east to west. This is called the earth's diurnal or daily motion by which the inhabitants on the equator are carried 1040 miles every hour. About the Publisher.
