Yet today when virtually all Americans graduate from high school we remain stunningly ignorant of history and government. In 2022 the National Assessment of Educational Progress found that only 13 percent of students scored a proficient level in history. Adults do no better: only 40 percent can name the three branches of government. In *The Cradle of Citizenship*, James Traub chronicles his year of observing public schools across the country, talking to teachers, scholars, and curriculum designers. He finds teachers in Florida who are afraid of discussing topics that might be seen as woke, a red-blue war incarnated in the 1619 Project and 1776 Report, a profound disagreement over what exactly civic education means, and most dismayingly, ever-diminishing expectations of students with ever-dwindling attention spans. Yet *The Cradle of Citizenship* also finds sources of hope. Traub learns that despite endless right-wing critiques, virtually all social studies teachers keep their personal views to themselves and encourage students to develop views of their own. He describes the extraordinary collaboration between liberal and conservative scholars that led to the creation of *Educating for American Democracy*, a roadmap for the teaching of civics. Finally, Traub describes the classical school, a traditional model based on the study of great books and the conscious molding of character, which is derided as reactionary in progressive circles yet prompts students to discuss books and ideas with depth. Shedding light on one of the most divisive issues of our time, *The Cradle of Citizenship* upholds a vision of civics education as it could be. *The Publishers Weekly*, 1877
