Going Ape Brandon Haught, 2014-04-22

Before William Jennings Bryan successfully prosecuted John Scopes in the infamous Scopes Monkey Trial he was a prominent antievolution agitator in Florida In Going Ape Brandon Haught tells the riveting story of how the war over teaching evolution began and unfolded in Florida one of the nation's bellwether states It still simmers just below the surface waiting for the right moment to engulf the state The saga opens with the first shouts of religious persecution and child endangerment in 1923 Tallahassee and continues today with forced delays and extra public hearings in state level textbook adoptions These ceaseless battles feature some of the most colorful culture warriors imaginable a real estate tycoon throwing his fortune into campaigns in Miami lawmakers attempting to insert the mandatory teaching of creationism into bills and pastors and school board members squabbling in front of the national media that descends into their small town The majority of participants however have been and still are average people and Haught expertly portrays these passionate citizens and the sense of moral duty that drives each of them Given a social climate where the teaching of evolution continues to sharply divide neighbors and communities Going Ape is a must read for anyone concerned with the future of public education

Human Language

Peter Hagoort, 2019-10-29 A unique overview of the human language faculty at all levels of organization Language is not only one of the most complex cognitive functions that we command it is also the aspect of the mind that makes us uniquely human Research suggests that the human brain exhibits a language readiness not found in the brains of other species This volume brings together contributions from a range of fields to examine humans language capacity from multiple perspectives analyzing it at genetic neurobiological psychological and linguistic levels In recent decades advances in computational modeling neuroimaging and genetic sequencing have made possible new approaches to the study of language and the contributors draw on these developments The book examines cognitive architectures investigating the functional

organization of the major language skills learning and development trajectories summarizing the current understanding of the steps and neurocognitive mechanisms in language processing evolutionary and other preconditions for communication by means of natural language computational tools for modeling language cognitive neuroscientific methods that allow observations of the human brain in action including fMRI EEG MEG and others the neural infrastructure of language capacity the genome's role in building and maintaining the language ready brain and insights from studying such language relevant behaviors in nonhuman animals as birdsong and primate vocalization Section editors Christian F Beckmann Carel ten Cate Simon E Fisher Peter Hagoort Evan Kidd Stephen C Levinson James M McQueen Antje S Meyer David Poeppel Caroline F Rowland Constance Scharff Ivan Toni Willem Zuidema

Experimental Design in Psychology

M. The Oxford Handbook of Moral Psychology Manuel Vargas, John Doris, 2022

The Oxford Handbook of Moral Psychology is a comprehensive multidisciplinary state of the art overview of moral psychology The 50 chapters written by leading figures in both philosophy and psychology cover many of the most important topics in the field and form the definitive survey of contemporary moral psychology

Oxford Handbook of Cultural Evolution Jamshid Tehrani, Rachel L. Kendal, Jeremy Kendal, 2025-07-16

This handbook offers a comprehensive overview of the interdisciplinary field of Cultural Evolution which has in recent years matured into an increasingly diverse and wide reaching but intellectually coherent research programme The book showcases the disciplinary spectrum of research into Cultural Evolution from

primatology and medieval literature to gene culture co evolution computer science anthropology archaeology and experimental psychology The handbook consists of review essays contributed by leading experts in their areas structured into ten sections covering key approaches and debates major themes and real world applications Taken together the essays offer an exceptionally broad and forward looking perspective on the field for researchers across the cognitive and evolutionary social sciences including those working in fields adjacent to Cultural Evolution such as Behavioural Ecology Evolutionary Psychology and Digital Humanities The handbook also provides a unique educational resource for students and teachers seeking to integrate Cultural Evolution into undergraduate and postgraduate curricula as well as highlighting some of the potential applications of Cultural Evolution in fields such as education public health and environmental policy

Structure, Evidence, and Heuristic Armin W. Schulz, 2020-04-22 This book is the first systematic treatment of the philosophy of science underlying evolutionary economics It does not advocate an evolutionary approach towards economics but rather assesses the epistemic value of appealing to evolutionary biology in economics more generally The author divides work in evolutionary economics into three distinct albeit related forms a structural form an evidential form and a heuristic form He then analyzes five examples of work in evolutionary economics falling under these three forms For the structural form he examines the parallelism between natural selection and economic decision making and the parallelism between natural selection and market competition For the evidential form he looks at the relationship between animal and human economic decision making and the evolutionary explanation of diversity in human economic decision making Finally for the heuristic form he focuses on the plausibility of equilibrium modeling in evolutionary ecology and economics In this way he shows that linking evolutionary biology and economics can make for a powerful methodological tool that can enable progress in our understanding of various economics questions Structure Evidence and Heuristic will be of interest to scholars and advanced students working in philosophy of science philosophy of social science evolutionary biology and economics

Replacing Darwin Nathaniel T Jeanson, 2017-09-01 If Darwin were to examine the evidence today using modern science would his conclusions be the same Charles Darwin's *On the Origin of Species* published over 150 years ago is considered one of history's most influential books and continues to serve as the foundation of thought for evolutionary biology Since Darwin's time however new fields of science have emerged that simply give us better answers to the question of origins With a Ph D in cell and developmental biology from Harvard University Dr Nathaniel Jeanson is uniquely qualified to investigate what genetics reveal about origins The Origins Puzzle Comes Together If the science surrounding origins were a puzzle Darwin would have had fewer than 15% of the pieces to work with when he developed his theory of evolution We now have a much greater percentage of the pieces because of modern scientific research As Dr Jeanson puts the new pieces together a whole new picture emerges giving us a testable predictive model to explain the origin of species A New Scientific Revolution Begins Darwin's theory of evolution may be one of science's sacred cows but genetics research is proving it wrong Changing an

entrenched narrative even if it's wrong is no easy task Replacing Darwin asks you to consider the possibility that based on genetics research our origins are more easily understood in the context of In the beginning God with the timeline found in the biblical narrative of Genesis There is a better answer to the origins debate than what we have been led to believe Let the revolution begin About the Author Dr Nathaniel Jeanson is a scientist and a scholar trained in one of the most prestigious universities in the world He earned his B S in Molecular Biology and Bioinformatics from the University of Wisconsin Parkside and his PhD in Cell and Developmental Biology from Harvard University As an undergraduate he researched the molecular control of photosynthesis and his graduate work involved investigating the molecular and physiological control of adult blood stem cells His findings have been presented at regional and national conferences and have been published in peer reviewed journals such as Blood Nature and Cell Since 2009 he has been actively researching the origin of species both at the Institute for Creation Research and at Answers in Genesis

The Freemason and Masonic Illustrated. A Weekly Record of Progress in Freemasonry ,1889

Hydrogen Energy California Project: Sections 4.3-4.8 California

Energy Commission,United States. Department of Energy,National Energy Technology Laboratory (U.S.),2013 This project is for an integrated gasification combined cycle IGCC power generating facility called Hydrogen Energy California HECA in Kern County California The project as proposed would gasify blends of petroleum coke 25 % and coal 75% to produce hydrogen to fuel a combustion turbine operating in combined cycle mode The gasification component would produce 180 million standard cubic feet per day MMSCFD of hydrogen to feed a 400 megawatt MW gross 288 MW net combined cycle plant providing California with dispatchable baseload power to the grid The gasification component would also capture approximately 130 MMSCFD of carbon dioxide or approximately 90 percent at steady state operation which would be transported and used for enhanced oil recovery and sequestration storage in the Elk Hills Oil Field Unit The HECA project would also produce approximately 1 million tons of fertilizer for domestic use California Energy Commission web site Docket
