

## Adaptive Functioning

Adaptive functioning refers to practical, everyday skills that help individuals to function efficiently, appropriately and safely in their everyday lives. To comprehensively and formally assess StudentName's present levels of adaptive functioning, the Adaptive Behavior Assessment System, Third Edition (ABAS-3) was administered. The ABAS-3 is a standardized rating scale used to assess school-aged children's behaviors at home, in school, in the community, and when appropriate, at the workplace. The ABAS-3 yields a Global Adaptive Composite (GAC), as well as three broad domain scores (Conceptual Composite, Social Composite, and Practical Composite). Under each broad domain are several narrow skill areas. The ABAS-3 was completed by Ms. ParentName, StudentName's mother, and Mrs. TeacherName, StudentName's special education teacher. More detailed information about each of these domains and respondent ratings is provided below.

### Adaptive Behavior Assessment System, Third Edition (ABAS-3) – Parent's Rating

This noteworthy revision focuses on what teachers really need to know to include assessment in the curriculum. Coverage includes all of the core information expected of an assessment text but the book goes far beyond the basics by addressing multicultural considerations, technology and assessment, high stakes testing and the reauthorization of IDEA.
