Abet Final Axam For 2015:

The Ballad of the Lone Medievalist Kisha G. Tracy, John P. Sexton, 2018 Working medievalists are often the only scholar of the Middle Ages in a department at a university or a hundred mile radius While working to build a body of focused scholarly work the lone medievalist is expected to be a generalist in the classroom and a contributing member of a campus community that rarely offers disciplinary community in return As a result overtasked and single medievalists often find it challenging to advocate for their work and field As other responsibilities and expectations crowd in we come to feel disconnected from the projects and subjects that sustain our intellectual passion An insidious isolation even from one another creeps in and soon even attending a conference of fellow medievalists can become a lonely experience Surrounded by scholars with greater institutional support lower teaching loads or more robust research agendas we may feel alienated from our work the work to which we've dedicated our careers The Lone Medievalist the collaborative community and the book is intended as an antidote to the problem of professional isolation It is offered in the spirit of common weal that marks the ideals if not always the realities of so many of the communities we study agricultural professional national notional and of course monastic The Ballad of the Lone Medievalist isn't only about scholarship or teaching or institutional life or the pursuit of new learning it's about all of them The essays in this volume address all aspects of the professional and intellectual life of medievalists Though many of us acknowledge and address the challenges in being Lone Medievalists these essays are not intended as voces clamantium they are offered to provide strategies camaraderie and an occasional bit of inspiration They are a call to action a sharing of hard won wisdom and a helping hand and above all a reminder that we are not alone

Ethics and Responsibilities of Engineers Frederick Bloetscher, 2021-11-30 In today's increasingly competitive business world engineers are continually faced with ethical questions that balance the needs of clients with those of society as a whole With the dynamic nature of technological growth the ethical challenges become more and more difficult to quantify and the potential for unintended and unwanted consequences increases exponentially Individual profits and public service do not often align hence the need for a code of ethics Ethics and Responsibilities of Engineers is designed to help students and new practitioners understand from where ethics originate and how they have developed in the profession It is written to help engineers understand how the coursework they take in school aligns with the public good What separates this book from others is the focus on the historical development of ethics for the profession and the role played by our educational system accreditation commissions and licensing boards The trust that the public has in their judgment to protect and serve society is what allows engineers to be held in high esteem

Teaching and Learning in a Digital World Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27-29 September 2017 The authors are currently witnessing a significant transformation in the development of education The impact of globalisation on all areas of human life the

exponential acceleration of technological developments and global markets and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education To face these current real world challenges higher education has to find innovative ways to quickly respond to them Since its inception in 1998 this conference has been devoted to new approaches in learning with a focus on collaborative learning Today the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context

American Universities Abroad Ted Purinton, Jennifer Skaggs, 2017 Across the globe American style and liberal arts universities are being established From the first the American University of Beirut established in 1866 to the liberal arts institutions being established in Saudi Arabia Ghana and elsewhere in the twenty first century there is a clear sense of the global desire for the American approach to higher education as a way of counteracting traditional more narrowly defined university educations However these universities operate in a distinctive dynamic that must learn to bridge one culture with another and leadership of such institutions must by its nature focus on such complexities and tensions Throughout the chapters of this book this unique element of these universities will be better understood through the stories and experiences as presented by their presidents provosts and other academic leaders
