

Research Paper on Abortion

The ethics of abortion is one of the most controversial topic that has been continually argued over years and probably many years to come. The main controversy is the question of legalization of abortion, which ties into ethical issues, emotions, and political issues or laws. Before I discuss the many sides to abortion, it is critical to define the term. The Webster's Dictionary defines abortion as the termination of a pregnancy after, accompanied by, resulting in, or closely followed by the death of the fetus. Despite the liberal attitudes toward abortion, it still remains an important political issue.

Even in societies where abortion has been legalized, many actions are being raised by the anti-abortionists. These anti-abortionists believe in "pro-life" and their religious perspectives are responsible in their arguments against abortion. They believe that "it is equally as heinous intentionally to kill a human being in existence at fertilization, as to kill a larger pre-born child." On the other hand, there are reasons for legalization of abortion. Most people agree with the concept of reproductive freedom—the fundamental right of every individual to decide freely and responsibly when and whether to have a child.

Human life is defined as "any living entity that has DNA from the species homo sapiens. This includes an ovum, spermatozoon, zygote, embryo, fetus, newborn. It also includes an infant, child, adult, elder. It also includes a breast cancer cell and a hair follicle and a skin scraping. Some forms of human life have little or no value; others are the most valuable and precious form of life in the known universe". Because an unborn fetus is considered to have a human life, abortion should not be legalized.

It is a definitely a crime to kill a living and breathing fetus even though the embryo may not take the form of a human structure. If abortion is permitted, the dignity of human will be destroyed. In the medical field, the doctors prescribe the baby before 15 days after conception as dividing cells. But after this short period, abortion is prohibited from the principal of identifying. This is because the fertilization process contains many cell divisions by zygote progressing into a human being. Many people assert the right that women do not have a baby because they have the right to choose.

But it is neglecting the right of the baby who has his or her own life. Just because an unborn fetus is not capable to express his or her feelings, is it morally right to end its life? Considering moral issues, abortion is definitely equally termed a murder. However, I do understand the other point of view for legalizing abortion. The exception to abortion is considered when the mother bearing the child has illnesses or diseases that can be transmitted to the baby genetically. Also, financial issues are often being raised by the parents whom are not able to support another family in the house.

Abortion Research Paper:

Abortion in India Leela Visaria, Shveta Kalyanwala, Vimala Ramachandran, 2026-01-22 Despite the legalisation of abortion in India in 1971 and new laws regulations introduced in 2002 and 2021 and notwithstanding the positive impact of Medical Abortion the sad reality is that morbidity and mortality continue to remain worrisome for many women undergoing abortions. In the early 2000s a lack of reliable information wide regional and rural urban differences and a thin research base made it difficult for policymakers, administrators and women's health advocates to develop strategic interventions. The earlier edition of this book used the in-depth qualitative research studies done in the early 2000s to highlight issues that emerged. These studies were part of the Abortion Assessment Project India AAP I jointly anchored by the Centre for Enquiry into Health and Allied Themes CEHAT and HealthWatch. The studies included sought to build a body of knowledge on all facets of induced abortion such as the unmet needs for contraception and abortion, the son preference, the preference for private providers and the neglected needs of the single, widowed or separated women to list policy level and on-ground implementation issues. More crucially they highlight the need to integrate diverse viewpoints that would further ease progression towards the common goal of making abortion an infrequently used but safe alternative for women faced with an unwanted pregnancy. The second edition revisits the studies in light of demographic shifts, changing social attitudes, technological advances and expanded access to medical abortion reflecting evolving reproductive rights in India. The book will be of interest to health activists and researchers, policymakers and programme implementers and those studying gender issues.

Abortion Research: International Experience Henry Philip David, 1974 **Women, Power and Autonomy**
Jocelynne A. Scutt, 2025-11-12 This book explores women's rights from an international perspective. The authors discuss abortion, surrogacy, prostitution, marriage and family law, touching on themes including children, property, forced and arranged marriage, and under-age marriage, separation, divorce, and widowhood. They also analyse commerce and financial rights as well as employment rights and women in the corporate sector. Throughout the book, these topics raise questions of respect from the perspective of violence against women, provision of resources and services, and women in the criminal justice system under bail and imprisonment. This book also addresses the representation of women in media and politics, including in film and literature. Overall, the authors explore the intersection of rights, respect, and representation, and their roles in women's status in society as well as in law.
