About Financial Accounting Volume 1 4th Edition 2011:

Comparative International Accounting, 14th Edition Christopher Nobes, Robert B. Parker, Robert H. Parker, 2020
Now in its 14th edition Nobes and Parker's Comparative International Accounting is a comprehensive and coherent text on international financial reporting. It is primarily designed for undergraduate and postgraduate courses in comparative and international aspects of financial reporting. The book explores the conceptual and contextual foundations of international financial reporting. **Teaching IFRS**
Richard M.S. Wilson, Ralph W. Adler, 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education: An international journal.

A-CSEAR 2015-Proceedings of the 14th Australasian Centre on Social and Environmental Accounting Research Conference
Dr James Hazelton and Dr John Dumay, 2015-11-13 The 14th Australasian Centre on Social and Environmental Accounting Research Conference (A-CSEAR 2015) is being held on 10-11 December 2015 at Macquarie University, Sydney, Australia. The Conference Chair is Dr John Dumay and the Programme Chair is Dr James Hazelton, both from Macquarie University. ACSEAR provides an opportunity for individuals researching and working in the field of social and environmental accounting in both public and private sectors to come together to exchange ideas and discuss current research in the field. The theme for the conference this year is Partnerships, reflecting the belief amongst our community that achieving progress requires partnerships of all types: between academics of different disciplines, between industry and academia, between government and stakeholders, and of course between members and professional bodies. The keynote speakers for the conference are Charles de Villiers from Auckland University of Technology, New Zealand, on the topic 'Theorising the interactions among legitimacy, accountability and proactivity in the social sphere'; Helen Tregidga from Auckland University of Technology, New Zealand, talking about 'Corporate chameleons: greenwashing and counter narratives'; Markus J. Milne from the School of Business and Law at the University of Canterbury, New Zealand, on the topic of 'Crass empiricism and the social construction of corporate environmental performance'; and Lee D. Parker from the School of Accounting, RMIT University, Melbourne, Australia, who will address the issue of 'Accounting for CSR: Revisiting the agenda'. ACSEAR received 60 abstracts.

Eikermann,2020-08-19 Nils Eikermann describes the framework conditions for the application of value based performance measures and critically analyses selected ones The disclosure of value based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors However companies adapt the developed theoretical concepts of value based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies In addition there is a variety of different metrics from which companies can choose The empirical study aims to reduce existing research gaps and is divided into three parts the analysis of annual reports of selected European companies the calculation of a standardised value based performance measure and a value relevance study in the form of an association study **Journal of Governmental and Financial**
