**How to Write Academic Texts** Alexander Styhre, 2013-10-09 This guide is

intended to serve as a rather brief and somewhat personal yet instructive treatise on how to think about academic writing. The first part of the book conceives of academic writing as based on a generic model that applies to virtually all kinds of publications including journal articles, doctoral theses and research monographs. Understanding this elementary morphology of such texts, their outline, employment and standard lines of reasoning is of great help when it comes to reducing the time spent on the format of the text. The second part of the book addresses a few practical issues pertaining to the practice of writing and publishing and discusses the role of disciplined yet open minded reading, the importance of establishing writing routines that suit your personality and work life situation and what to bear in mind when eventually disclosing written texts to external evaluators be they supervisors, journal editors or publishing house editors. *From Inquiry to Academic Writing: a Practical Guide* Stuart Greene & April Lidinsky, 2013

**Thinking it Through : a Practical Guide to Academic Essay Writing** Taylor, Catherine, Trent University. Academic Skills Centre, 1987

Academic Writing Stephen Bailey, 2011

Most international students need to write essays and reports for exams and coursework. Yet writing good academic English is one of the most demanding tasks students face. This new edition of *Academic Writing* has been fully revised to help students reach this goal. Clearly organised, the course explains the writing process from start to finish. Each stage is demonstrated and practised from selecting suitable sources, reading, note making and planning through to re writing and proof reading. The four main parts of *Academic Writing* allow teachers and students to easily find the help they need. Each part is divided into short sections which contain examples, explanations and exercises for use in the classroom or self study. Cross references allow easy access to relevant sections and a full answer key is featured on the companion website. The third edition of this popular course builds on the success of the earlier editions and responds to suggestions from both students and teachers. Plagiarism has become a major concern in higher education and a special feature of *Academic Writing* is a section on avoiding plagiarism. There are also units on the key skills of paraphrasing, summarising and referencing. The book includes sections on crucial areas such as argument, cause and effect, comparison, definitions and academic style. Working in groups, dealing with graphs, charts and numbers and giving examples are explained in detail. Another part deals with accuracy in writing providing practice with topics such as vocabulary, conjunctions and prepositions. The final part provides a range of writing models of both short and longer essays and reports. A new companion website offers further practice with a range of additional exercises including answers. All international students wanting to maximise their academic potential will find this practical and easy to use book a valuable guide to writing in English for their degree courses.
