## ABSTRACT

The following bibliography is comprised of a list of published empirical studies that examined the quality of academic business journal, using different methods. There is no consensus on methods to determine what is or is not a “best” journal in an academic field, in terms of its quality. However, there is consensus in nearly all business fields as to what scholars in those fields perceive to be the top three, four or five journals. I provide, after each source in the references section, links to the full papers on the quality of academic journals in various business fields. This list is a starting point for any scholar interested in conducting a study to determine the quality of an academic journal in their business field. Moreover, every study in this list has its own reference section, which will lead you to dozens of sources pertinent to any investigation on the quality of academic business journals.
