

**UNIVERSITY OF MAINE SYSTEM
ACADEMIC DEGREE: FULL PROGRAM PROPOSAL**

I. Full Academic Degree Program Title

Master of Science: Spatial Informatics
University of Maine (CIP Code: 14.3801)

II. Program Objectives

The objective of this proposal is to provide an "all e-learning" "all coursework" master-of-science degree in Spatial Informatics (MSSI) for place-bound students that desire strong theory, computational, analytical, policy and technical foundations in geographic information science and systems. As a general rule, students may view class videos and accomplish assignments at any time throughout a week in any of the offered program courses and have the weekly opportunity (or requirement) to participate in a one to two hour "live" discussion session at a mutually convenient time for class members prior to the due dates for their weekly assignments. The MS Spatial Informatics graduate degree is an "online only" version of the existing and more intense on-campus research-focused *MS in Spatial Information Science and Engineering* degree. An innovative funding approach is used to ensure sustainability of the program and increase the potential for substantial financial benefits for the university.

A. Program Rationale

The business climate in Maine and the rest of the nation is characterized by rapid technological change, intense global competition, faster product life cycles and more complex, specialized markets. Individuals with information systems expertise who can design and develop information systems, manage sophisticated information resources, work on interdisciplinary teams and communicate effectively with business managers, engineers and other end-users are in short supply. A major goal of all the graduate programs in the School of Computing and Information Science is to produce individuals who can make significant contributions to economic development by ensuring that private and public enterprise have the expertise needed to remain competitive.

Already existing on-campus programs include the *Master of Science in Information Systems* (MSIS) and the *Graduate Certificate in Information Systems* (GC-IS) (<http://www.umaine.edu/msis/curriculum-and-degree-requirements/>) as well as the *Master of Science in Spatial Information Science and Engineering* (MS-SIE) and the *Graduate Certificate in Geographic Information Systems* (GC-GIS) (<http://spatial.umaine.edu/graduate-info/sie-graduate-info/>). Many of the courses affiliated with these programs are already offered with online class sections. This proposed graduate program will help us move to offering e-learning class sections for most of our non-research focused master's level courses.
