Academically Adrift Limited Learning On College Campuses:

Academically Adrift Richard Arum, Josipa Roksa, 2011-01-15 In spite of soaring tuition costs more and more students go to college every year. A bachelor's degree is now required for entry into a growing number of professions. And some parents begin planning for the expense of sending their kids to college when they're born. Almost everyone strives to go but almost no one asks the fundamental question posed by **Academically Adrift**: are undergraduates really learning anything once they get there? For a large proportion of students Richard Arum and Josipa Roksa's answer to that question is a definitive no. Their extensive research draws on survey responses, transcript data, and for the first time the state-of-the-art Collegiate Learning Assessment, a standardized test administered to students in their first semester and then again at the end of their second year. According to their analysis of more than 2,300 undergraduates at twenty-four institutions, 45 percent of these students demonstrate no significant improvement in a range of skills including critical thinking, complex reasoning, and writing during their first two years of college. As troubling as their findings are, Arum and Roksa argue that for many faculty and administrators they will come as no surprise: instead they are the expected result of a student body distracted by socializing or working and an institutional culture that puts undergraduate learning close to the bottom of the priority list. **Academically Adrift** holds sobering lessons for students, faculty, administrators, policy makers, and parents, all of whom are implicated in promoting or at least ignoring contemporary campus culture. Higher education faces crises on a number of fronts but Arum and Roksa's report that colleges are failing at their most basic mission will demand the attention of us all.

Aspiring Adults Adrift Richard Arum, Josipa Roksa, 2014-09-02 Few books have ever made their presence felt on college campuses and newspaper opinion pages as quickly and thoroughly as Richard Arum and Josipa Roksa's 2011 landmark study of undergraduates' learning, socialization, and study habits. **Academically Adrift Limited Learning on College Campuses** From the moment it was published, one thing was clear: no university could afford to ignore its well-documented and disturbing findings about the failings of undergraduate education. Now Arum and Roksa are back and their new book follows the same cohort of undergraduates through the rest of their college careers and out into the working world. Built on interviews and detailed surveys of almost a thousand recent college graduates from a diverse range of colleges and universities, **Aspiring Adults Adrift** reveals a generation facing a difficult transition to adulthood. Recent graduates report trouble finding decent jobs and developing stable romantic relationships, as well as assuming civic and financial responsibility; yet at the same time they remain surprisingly hopeful and upbeat about their prospects. Analyzing these findings in light of students' performance on standardized tests of general collegiate skills, selectivity of institutions attended, and choice of major, Arum and Roksa not only map out the current state of a generation too often adrift but enable us to examine the relationship between college experiences and tentative transitions to adulthood. Sure to be widely discussed, **Aspiring Adults Adrift** will compel us once again to re-examine the aims, approaches, and achievements of higher education.

As Professors Lay Dying Jacques Berlinerblau, 2025-09-30 As professors in the United States are being paid less and less to teach more and more undergraduates prospective students need all the information they can get about receiving their tuition dollars worth About to choose a college About to make an investment that might exceed a quarter million dollars Worried about ideological indoctrination on university campuses Then you need to know a lot about professors There has been perhaps no worse time to be a scholar in the United States than now The misery experienced by the professoriate has immediate and dramatic effects on the education that undergraduates receive *As Professors Lay Dying* seeks to help you answer the following questions 1 How important are professors to my college education 2 How seriously do they take the responsibility of teaching undergraduates 3 What kind of professors are actually in the classroom working with American coeds 4 Is ideological indoctrination a real danger to the nation's matriculated youth 5 What kind of schools should a discerning college shopper look for 6 Ultimately why are professors so essential to the delivery of a first class education Colleges don't advertise the state of their faculty but it might be the most important factor in your decision This book pulls back the curtain on the profession that shapes the minds of the next generation

Academic and Professional Writing in an Age of Accountability

Shirley Wilson Logan, Wayne H. Slater, 2018-12-27 What current theoretical frameworks inform academic and professional writing What does research tell us about the effectiveness of academic and professional writing programs What do we know about existing best practices What are the current guidelines and procedures in evaluating a program's effectiveness What are the possibilities in regard to future research and changes to best practices in these programs in an age of accountability

Editors Shirley Wilson Logan and Wayne H Slater bring together leading scholars in rhetoric and composition to consider the history trends and future of academic and professional writing in higher education through the lens of these five central questions The first two essays in the book provide a history of the academic and professional writing program at the University of Maryland Subsequent essays explore successes and challenges in the establishment and development of writing programs at four other major institutions identify the features of language that facilitate academic and professional communication look at the ways digital practices in academic and professional writing have shaped how writers compose and respond to texts and examine the role of assessment in curriculum and pedagogy An afterword by distinguished rhetoric and composition scholars Jessica Enoch and Scott Wible offers perspectives on the future of academic and professional writing This collection takes stock of the historical rhetorical linguistic digital and evaluative aspects of the teaching of writing in higher education Among the critical issues addressed are how university writing programs were first established and what early challenges they faced where writing programs were housed and who administered them how the language backgrounds of composition students inform the way writing is taught the ways in which current writing technologies create new digital environments and how student learning and programmatic outcomes should be assessed

Ensuring Adult and Non-Traditional Learners' Success With Technology, Design, and Structure Jennings, Charity L. B.,2021-04-23 With the increasing share of adult and non traditional students in the higher education student body higher education faculty and administrators must ensure that the design of programs courses and student services support the success of all students The needs and wants of these adult and non traditional learners will differ and it is important that research helps advance the understanding of these students to increase their success acclimation and experience in institutions Ensuring Adult and Non Traditional Learners Success With Technology Design and Structure is designed to provide higher education professionals with current research and research based best practices for ensuring student success for adult learners and non traditional students The research presented in this book will help ensure that programs courses and student services are designed and implemented in a manner that supports student success for all learners in the institution Chapters include research on student motivation program design educational technology student engagement and more This book is intended for post secondary administrators faculty teachers administrators teacher educators practitioners stakeholders researchers academicians and students interested in relevant educational services for adult learners and non traditional students

Higher Education Outcomes Assessment for the Twenty-First Century Peter Hernon,Robert E. Dugan,Candy Schwartz,2013-05-09 This book discusses recent trends in outcomes assessment examines how state governments are reshaping the national discussion with higher education and explains how libraries must respond to these changes Higher Education Outcomes Assessment for the Twenty first Century focuses on recent developments in outcomes assessment especially from the perspectives of the federal government and state governments as well as foundations concerned about

the state of higher education The authors identify the significant changes that these stakeholders call for information that academic librarians and anyone following outcomes assessment need to be aware of and interpret the discussions to identify implications for libraries Building upon the foundation of knowledge presented in the previous two Libraries Unlimited Outcomes Assessment in Higher Education titles this book provides readers with up to date coverage of topics such as the emerging metrics used to define student and institutional success the increased importance of accountability and the need to compare and assess the performance of programs and institutions rather than individual courses and the shift in prioritizing student outcomes over student learning outcomes The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit **Improving Undergraduate Learning** Arum, Richard,2010 **The Secrets of Top**

Digital Dieting Tara Brabazon,2016-04-22 Imagine if a student spent as much time managing information as celebrities doted on dieting While eating too much food may be the basis of a moral panic about obesity excessive information is rarely discussed as a crisis of a similar scale Obviously plentiful and high quality food is not a problem if eating is balanced with exercise But without the skills of media and information literacy students and citizens wade through low quality online information that fills their day yet does not enable intellectual challenge imagination and questioning Digital Dieting From Information Obesity to Intellectual Fitness probes the social political and academic difficulties in managing large quantities of low quality information But this book does not diagnose a crisis Instead Digital Dieting provides strategies to develop intellectual fitness that sorts the important from the irrelevant and the remarkable from the banal In April 2010 and for the first time Facebook received more independent visitors than Google Increasingly there is a desire to share rather than search But what is the impact of such a change on higher education If students complain that the reading is too hard then one response is to make it easier If students complain that assignments are too difficult then one way to manage this challenge is to make the assignments simpler Both are passive responses that damage the calibre of education and universities in the long term Digital Dieting From Information Obesity to Intellectual Fitness provides active conscious careful and applicable strategies to move students and citizens from searching to researching sharing to thinking and shopping to reading

Teaching Sustainability Wendy Petersen Boring,William Forbes,William Forbes (Professor of geography),2013 American colleges and universities have been relatively quick to address the challenge of sustainability in operations Ironically they have been slower to respond in regard to their core mission educating students Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences The essays in this collection are richly diverse They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer They also address big questions

such as how to make education meaningful how to examine hidden assumptions underlying current curricula and how a focus on sustainability can answer critics of contemporary higher education The heart of teaching sustainability is reflection and advice on pedagogy From these richly diverse case studies important common themes emerge the symbiotic relationship between classroom and campus operations techniques for transforming the campus itself from merely a setting to a learning laboratory and the potential of community partners for teaching sense of place An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy Essays on theory and practice individual and collaborative projects service learning and consequential activities all exemplify how sustainability and deep learning go hand and hand Like sustainability itself the volume infuses theory with practical application The contributors demonstrate the ways in which a single course can serve as a powerful change agent for an entire campus how to build bridges between faculty and administrators and even how to move forward on modest budgets The authors themselves constitute a network of advisors Publisher s description [Studies in Income and Wealth](#) ,1937 [Qui Parle](#) ,2010 **Journal for Research in Mathematics Education** ,2014
