

different ways to understand how to solve problems about time.

Sadie spends  $1\frac{1}{2}$  hours doing homework. She plays outside for 15 minutes and practices the piano for a quarter of an hour. How many more minutes does Sadie spend doing homework, playing outside, and practicing the piano compared to playing outside?

Use a bar model to solve time comparison problems.

To show the amount of time that Sadie spends doing homework, draw a bar and divide it into 3 equal parts. Draw another bar next to each other to show the amount of time she spends playing outside and practicing the piano. Draw a bar from the end of those two bars to the end of the homework bar to represent how much more time she spends on homework. Show all the times in minutes.

Use a bar model to write an equation to solve the problem.

$$\text{minutes} = (\text{playing} + \text{practicing}) \text{ minutes} + \text{how many more homework minutes}$$

minutes Sadie spends on homework, playing outside, and practicing the piano. How much more time Sadie spends on homework,  $n$ , is unknown.

$$15 + 15 + n$$

## CONNECT IT

Now you will use the problem from the previous page to help you understand how to solve problems about time by converting units of time and using equations. Use the Math Reference Sheet as necessary.

1. Look at the bar model in the first Model It. Why do you think the amount of time Sadie spends on homework and practicing piano changed to a number of minutes?
2. How much time does Sadie spend doing homework? \_\_\_\_\_
3. How much time does Sadie spend playing outside and practicing the piano? \_\_\_\_\_
4. Write and solve another equation to model the situation. Use the time Sadie spends doing homework and the total time Sadie spends practicing the piano and playing outside that you found in problems 2 and 3.
5. Look back at the equation at the bottom of the previous page. How is that equation similar to or different from the equation you wrote in problem 4?

## 6. REFLECT

Look back at your Tiny It, strategies by classmates, and Model Its. Which models or strategies do you like best for solving multi-step problems about time? Explain.

# Answer Manual For Textbooks

**Michael R. Lindeburg**

## **Answer Manual For Textbooks:**

**Financial Accounting** Jerry J. Weygandt, Paul D. Kimmel, Donald E. Kieso, 2009-11-02 Weygandt helps corporate managers see the relevance of accounting in their everyday lives Challenging accounting concepts are introduced with examples that are familiar to them which helps build motivation to learn the material Accounting issues are also placed within the context of marketing management IT and finance The new Do It feature reinforces the basics by providing quick hitting examples of brief exercises The chapters also incorporate the All About You AAY feature as well as the Accounting Across the Organization AAO boxes that highlight the impact of accounting concepts With these features corporate managers will learn the concepts and understand how to effectively apply them
