breakthrough approach that focuses on people's behaviors both within and outside of the organization. He presents the next practices of performance management revealing that the trick is to focus on human behaviors to create strategic alignment across the organization. After reviewing the most popular methodologies today, Frank shows how predicting and correcting human behaviors is the key to achieving your desired results. Performance management is intended to support decision making, manage business operations, and drive people's behavior. In most cases, however, the behavioral side is forgotten. The framework in Performance Leadership enables you to motivate your people to follow a common path, avoid dysfunctional behaviors, create strategic alignment, all people taking the right actions, raise the bar of expected performance. Full of case studies, practical examples, and unconventional thinking, Performance Leadership will help you create better management processes and performance indicators that will help you make the most of your scorecards and strategic plans. Our changing performance landscape is still evolving as it continues to be formed by strict regulations on compliance and transparency, a global economy, social pressures of greater corporate responsibility, and a wave of new business innovations. In this ever-changing new business environment, Performance Leadership is a forward-thinking road map you cannot afford to be without.
