ACTION-PACKED MEASUREMENTS

Embedded Assessment 2

Use after Activity 35

Play-Tel Toys has entered talks to create action figures for the latest Hollywood blockbuster film. The film's main character, a robot named Arigato, is the focus of the marketing campaign.

In order to do a cost analysis for creating the action figures, Play-Tel designers must determine the surface area and volume of the robot's body parts. Although the final shapes will be crafted in much greater detail, each body part will first be molded into the solids, as indicated in the diagram.

1. Complete the table based on the dimensions provided in the diagram.

	Surface Area	Volume
Cylindrical Head		
Conical Hat		
Right Cylinder Torso		
Right Cylinder Arm		
Square Prism Leg		

2. Each piece of the action figure will be painted before assembly. If it costs \$0.02 per square centimeter to paint, determine the cost to paint each action figure.
3. The designers also need to determine the total amount of plastic to be used in the molds for each robot. If each cubic centimeter of plastic costs \$0.03, determine the total cost to mold each action figure.
