

## CABLE MODEM/ROUTER WITH WIRELESS-N QUICK START

This Quick Start description is to assist the Cable Modem/Router with Wireless-N as a cable modem device as an internet gateway for computers and/or other wired devices in your home (wired devices include: land-line phone, television, television set-top boxes, etc.). For the best results, please refer to the User Manual (see the FCC label).

### Package Contents

- Cable Modem/Router
- Power cord
- Ethernet RJ-45 cable
- CD with User Manual

### Before installing Your Cable Modem

Your cable service provider wants to know your modem's MAC ADDRESS, which is a unique ID label on the bottom of your modem. This information identifies your cable modem service as your device's identification by linking the cable company (ISP) to the modem. To obtain this ID label, you may be asked to provide the modem's model name and number, which is **CM1080M**. If you need the modem's model number, you can find it from the MAC address on the modem label.

### System Requirements

- The modem connects the cable modem to a cable modem service that uses one of the popular DOCSIS standards - DOCSIS 1.1, 2.0, or 3.1. If you need to get cable modem service, please speak with your cable service provider.
- To use the Quick Start, you need a computer, an iPod™, or another tablet.

If your cable service provider provided a cable modem starter kit, please confirm with them that you have your cable modem. The kit may include a modem cable for connecting your modem to your cable service. (The cable may include a modem-to-modem cable or a modem-to-router cable, depending on the modem.) The modem also includes a DOCSIS address. If you receive a kit like this, we guarantee that you need the kit's components and nothing is included in this cable modem starter kit. The modem is DOCSIS 1.1 compliant, Cable-DOCS, and connects to a normal cable modem.

### If your cable service provider provided a cable modem starter kit

Some cable service providers supply a cable modem starter kit that includes a cable modem and a modem cable. The kit may include a modem cable for connecting your modem to your cable service. (The cable may include a modem-to-modem cable or a modem-to-router cable, depending on the modem.) The modem also includes a DOCSIS address. If you receive a kit like this, we guarantee that you need the kit's components and nothing is included in this cable modem starter kit. The modem is DOCSIS 1.1 compliant, Cable-DOCS, and connects to a normal cable modem.

You should be able to connect the modem's power cord, connect the cable modem service company's modem cable, and then connect to a computer using either the Ethernet (Ethernet only) or the modem's USB (using the Cable Modem/Router to Router or Wireless Connection).

**Note:** Please refer to the Hardware Connection section. Your modem will be in a default state of the last state cable modem with a description of the connections.

After you have installed your cable modem with the recommended setup, you can connect your cable modem to your computer for the Internet.

**Note:** Please refer to the Hardware Connection section for the best results. Connecting the modem to your computer may require a cable modem service provider to communicate. For details, see the DOCSIS 1.1, 2.0, or 3.1 User Manual. After connecting, you can check the status light to see if the modem is working.

Now open your browser and go to the website that says to check that the cable modem is working.

- If you want to connect the modem/router directly to your device, see **Connecting the Cable Modem/Router Wirelessly to Your Device**.

- If you want to connect additional computers/devices using the modem/router's Ethernet LAN ports, please see **Read This Only if You Are Connecting Additional Computers and/or Other Devices to the Cable Modem/Router's Ethernet ports**.
- If you want to configure advanced options, please refer to the User Manual or the CD.

### How to connect to a computer if you don't have or choose not to use a cable modem starter kit

1. Be sure your computer is on and the cable modem is plugged into the modem. Please refer to the Hardware Connection section. Your modem will be in a default state of the last state cable modem with a description of the connections. Please refer to the following steps.
2. Disconnect one of the modem cables in the cable modem's status. Connect the other end of the modem cable to the Cable Modem/Router's Ethernet port. For details, see the Hardware Connection section. The status light should be on.
3. The cable modem's status light should be on. If it is not, please refer to the Hardware Connection section. The status light should be on. If it is not, please refer to the Hardware Connection section. The status light should be on.
4. Plug the power cord into the AC IN connector on the back of the cable modem and the power cord into the power cord on the back of the cable modem. The status light should be on.
