Mathematics Catalog 2005 Neil Thomson, 2004-10 **Differential Equations with Maple V®** Martha L. Abell, James P. Braselton, 2014-05-09 *Differential Equations with Maple V* provides an introduction and discussion of topics typically covered in an undergraduate course in ordinary differential equations as well as some supplementary topics such as Laplace transforms Fourier series and partial differential equations. It also illustrates how Maple V is used to enhance the study of differential equations not only by eliminating the computational difficulties but also by overcoming the visual limitations associated with the solutions of differential equations. The book contains chapters that present differential equations and illustrate how Maple V can be used to solve some typical problems. The text covers topics on differential equations such as first order ordinary differential equations, higher order differential equations, power series solutions of ordinary differential equations, the Laplace Transform, systems of ordinary differential equations, and Fourier Series and applications to partial differential equations. Applications of these topics are also provided. Engineers, computer scientists, physical scientists, mathematicians, business professionals, and students will find the book useful. **The Maple V Handbook** Martha L. Abell, James P. Braselton, 1994 An exhaustive reference work and a valuable addition to every Maple V owner's library. Each of the more than 2500 functions in this guide are covered in alphabetical order with a separate section devoted to graphics.
